**Introduction**

The purpose of this Manual is to provide a reference for the policies established by the New Mexico Human Services Department (HSD) for the administration of the CareLink NM Health Home (CLNM) program. The Manual was developed by the Medical Assistance Division (MAD) of HSD to assist in the administration of the CLNM program, and is intended to provide direction to the agencies who serve as CLNM providers.

The CareLink NM program provides services authorized by Section 2703 of the Patient Protection and Affordable Care Act (P.L. 111-148, ACA). Services are delivered through a designated provider agency to enhance the integration and coordination of primary, acute, behavioral, social, and long-term services and supports. The CLNM provider agency assists a CLNM member (member) by engaging him or her through more direct relationships and intensive care coordination resulting in a comprehensive needs assessment (CNA) and plan of care (Service Plan). The goals of the CLNM Health Homes are to:

1. Promote acute and long term health;
2. Prevent risk behaviors;
3. Enhance member engagement and self-efficacy;
4. Improve quality of life for individuals with SMI/SED; and
5. Reduce avoidable utilization of emergency department, inpatient and residential services

**Authority**

New Mexico implemented Centennial Care in 2014 to modernize New Mexico’s Medicaid program and developed the CLNM Health Home benefit for some of the State’s most vulnerable residents. The mission of CLNM is to promote self-management of care choices through a supportive learning environment. CLNM services will also provide expanded supports such as case management and care coordination for physical and behavioral health, long-term care, and social needs such as housing, transportation, and employment. CLNM will provide integrated care for Medicaid recipients and Managed Care Organization (MCO) members with chronic conditions, targeting a vulnerable population with behavioral health needs. The first phase of CLNM is for Medicaid-eligible adults with Serious Mental Illness (SMI), and Medicaid-eligible children and adolescents with a Severe Emotional Disturbance (SED). HSD is leading the statewide initiative to provide coordinated care by a CLNM provider for individuals with the aforementioned chronic conditions and all associated comorbidities.
The policies in this Manual will be reviewed periodically. HSD reserves the right to modify or supersede any policies and procedures. As policies are revised, they will be incorporated into the Manual. The CLNM Provider Policy Manual may be viewed or downloaded from MAD's home page website at www.hsd.state.nm.us

The Manual is issued and maintained by HSD to provide guidance. It is the responsibility of all entities affiliated with CLNM to review and be familiar with the contents of this Manual.

**Introduction to the CareLink Health Home Model**

**Overview**

The CareLink NM service delivery model will enhance integration and coordination of primary, acute, behavioral health, and long-term care services and supports across the lifespan for persons with chronic illness. The CLNM model builds on efforts made through the development and implementation of the Centennial Care program to improve integrated care and member engagement in managing their health. In New Mexico's health home model, CLNM provider agencies (providers) will enhance their current operating structure to provide care coordination by partnering with physical health providers and specialty providers. CLNM providers will utilize health information technology (HIT) to monitor care and provide comprehensive record management. Providers will serve fee-for-service (FFS) recipients and MCO members already receiving behavioral health services as well as new individuals who are eligible and to participate in the program.

**Core Service Definitions**

CLNM providers must demonstrate the ability to deliver all core services and meet all data and quality reporting requirements described in this Manual. Providers may elect to meet the service needs of members by providing integrated physical and behavioral health services through an on-site, colocation model, or through a number of memoranda of agreement (MOA). MOA are required with at least one primary care practice that serves members less than 21 years of age and at least one primary care practice that serves members 21 years of age and older. Agreements are also required for local hospitals and residential treatment facilities. Other referral relationships are developed through less formal processes, but are critical for the multi-disciplinary team approach to integrated care.

Providers must deliver services in six core categories to members: Comprehensive Care Management, Care Coordination, Prevention and Health Promotion, Comprehensive Transitional Care, Individual and Family Support Services, and Community and Social Support Service Referrals. Providers will also utilize CLNM health information technology. Following are descriptions of the core service categories:
Comprehensive Care Management

Comprehensive Care Management involves a comprehensive needs assessment and the development of an individualized Service Plan with active participation from the CLNM member, family, caregivers and the health home team. Comprehensive care management services must also include:

- Assignment of health team roles and responsibilities;
- Development of treatment guidelines for health teams to follow across risk levels or health conditions;
- Oversight of the implementation of the CareLink NM Plan which bridges treatment and wellness support across behavioral health, primary care and social health supports;
- Through claims-based data sets, monitoring of individual health status and service use to determine adherence to or variance from treatment guidelines; and
- Development and dissemination of reports that indicate progress toward meeting outcomes for client satisfaction, health status, service delivery and costs.

Comprehensive care management activities include a needs assessment, as described below.

CLNM Comprehensive Needs Assessment (CNA)

The provider agency is responsible for conducting the CNA to determine a member’s needs related to physical and behavioral health, long-term care, social and community support resources and family supports.

Note: The CNA is not a psychiatric diagnostic evaluation (90791-92) to determine eligibility; it is a screening and assessment tool to establish service needs. If no diagnosis from previous records is available, a psychiatric diagnostic evaluation must also be completed. The CNA provides all the required data elements specified in the HSD authorized CNA (one version for children and one for adults).

The CNA:

- Assesses preliminary risk conditions and health needs;
- Uses data from the risk management system to help determine care coordination levels;
- Requires outreach to potential CLNM members within 14 calendar days of receipt of a referral;
- Must document that a provider contacted and/or met with a member to at least begin assessment within the mandated 14-day timeframe;
- May conduct face-to-face meetings in a member’s home. If the member is homeless, the meeting may be held at a mutually agreed upon location;
• May enroll a member during the first visit if using the Treat First model. The member would be assigned a “pending” status or assigned care coordinator level 8 until a diagnosis of SMI or SED is finalized and accepted by the member. The CNA can be completed over the course of four appointments; when completed, the care coordination level is updated.

Note: For children involved with the NM Children, Youth, and Families Department in Protective Services and/or Juvenile Justice, a Child and Adolescent Needs and Strengths assessment may also be indicated however the CNA is still required.

Levels of Care and CNA Frequency
A managed care organization’s Health Risk Assessment (HRA) is used to determine if a member requires care coordination level 1 or a CNA to determine if care level 2 or 3 is appropriate. Level 2 or 3 determinations denote a CLNM referral if qualifying diagnoses are present. A member who has been determined to require level 1 care and has had BH services with a pertinent diagnosis, but whom a provider has not been able to contact, may also be referred.

Note: If a significant change in a member’s condition leads to increasing service needs, the assessment timeframe is expedited and service changes are instituted within ten calendar days. “Significant change” might include a member becoming medically complex or fragile, identification of a substance dependency, diagnosis of significant cognitive deficits, or identification of contraindicated pharmaceutical use. In addition, the CLNM care coordinator should consider changes in a member’s housing, social supports or other nonmedical services that would provide additional supports.

The following list establishes guidelines for frequency of needs assessments based upon care coordination levels, and outlines caseload recommendations by level:

• Care coordination levels 6 or 7, assigned by the CLNM provider, have similar attributes as MCO care coordination levels 2 and 3. The variation in numbering systems is for system tracking purposes;
• Level 8 care coordination is a temporary determination used for new admissions until the CNA and level determination are complete;
• Level 6 care coordination requires a needs assessment at least annually (caseload recommendation is 1:51-100);
• Level 7 care coordination requires a needs assessment at least semi-annually (caseload recommendation is 1:30 – 1:50);
• If high fidelity wraparound services for children/adolescents are in place, level 9 caseload recommendation is 1:8 – 1:10.

Care Coordination Level 6 Requirements
Based on results obtained from the CNA, the provider shall assign care coordination level 6, minimally, to members with one of the following:

- A comorbid health condition;
- High emergency department (ED) use, defined as three or more visits within 30 days;
- A mental health condition causing moderate functional impairment;
- Requirement for assistance with two or more activities of daily living (ADL) or instrumental activities of daily living (IADL) who live in the community at low risk;
- Mild cognitive deficits requiring prompting or cues;
- Poly-pharmaceutical use, defined as simultaneous use of six or more medications from different drug classes and/or simultaneous use of three or more medications from the same drug class.

**Care Coordination Level 7 Requirements**

Based on the results of the CNA, the provider shall assign care coordination level 7, at a minimum, to members with one of the following:

- Determination of medical complexity or fragility;
- Excessive ED use (four or more visits within a 12 month period);
- A mental health condition causing high functional impairment;
- Untreated comorbid substance dependency based on the current DSM or other functional scale determined by the State;
- Requirement of assistance with two ADL or IADL and living in the community at medium to high risk;
- Significant cognitive deficits;
- Contraindicated pharmaceutical use.

**Care Coordination Level 9 Requirements**

A Level 9 is indicated for children and youth ages 4-21 with:

- Diagnosis of Serious Emotional Disturbance (SED); AND
- Multi-system involvement, i.e. two or more systems involvement including Juvenile Justice, Protective Services, Special Education or Behavioral Health; AND
- At risk of or in out-of-home placement OR previous out of home placement, incarceration, or acute hospitalization within a two year period prior to evaluation; AND
- Functional impairment in home, school or community (as measured by the Children and Adolescents Needs and Strengths (CANS) or Child and Adolescent Functional Assessment Scale (CAFAS).

**CLNM Service Plan**

The Service Plan, provided by HSD, maps a member’s path toward self-management of physical and behavioral health conditions, and is specifically designed to help members meet needs and achieve goals. The Service Plan is a document intended to be updated
frequently to reflect identified needs, communicate services a member will receive, and serve as a shared plan for the member, their family or representatives, and service providers. The plan is intended to be supplemented by treatment plans developed by practitioners. The Service Plan:

- Requires active participation from members, family, caregivers, and team members;
- Requires consultation with interdisciplinary team experts, primary care provider, specialists, behavioral health providers, and other participants in a member’s care;
- Identifies additional health recommended screenings;
- Addresses long-term and physical, behavioral, and social health needs;
- Is organized around a member’s goals, preferences and optimal clinical outcomes, including self-management. The plan includes as many short- and long-term goals as needed;
- Specifies treatment and wellness supports that bridge behavioral health and primary care;
- Includes a backup plan that addresses situations when regularly-scheduled providers are unavailable, and provides contact information for people and agencies identified in the backup plan. This is primarily for members receiving home- and community-based services where there is a nursing facility level of care (NFLOC) determination. There is no required template; the plan is uploaded as a file into the State’s web-based data collection tool, BHSDStar (please refer to the “Health Information Technology” section of this manual on page 30 for information on BHSDStar);
- Includes a crisis/emergency plan listing steps a member and/or representative will take that differ from the standard emergency protocol in the event of an emergency. These are individualized plans, uploaded into BHSDStar;
- Is shared with members and their providers;
- Is updated with status and plan changes.

**CLNM Team Roles**

The following list describes the roles of the CLNM team members:

- Develop treatment guidelines for health teams that establish clinical pathways across risk levels or health conditions;
- Oversee the implementation of Service Plans;
- Monitor individual and population health status and service use to determine adherence to or variance from Service Plans and best practice guidelines. Teams will use claims-based data sets and other tools to track population based care.
- Report on progress toward meeting outcomes, e.g. client satisfaction, health status, service delivery, and costs.
**Care Coordination**

These activities are conducted by care coordinators with members, their identified supports, medical and behavioral health providers and community providers. Care is coordinated across care settings to implement the individualized Service Plan, and to coordinate appropriate linkages, referrals, and follow-up. Care coordination promotes integration and cooperation among service providers and reinforces treatment strategies that support members’ motivation to better understand and actively self-manage his or her health conditions. Care coordinators’ activities include, but are not limited to:

- Outreach and engagement of CLNM members;
- Communication with members, their family, other providers and team members, including a face-to-face visit to address health and safety concerns;
- Ensuring members and their identified supports have access to medical, behavioral health, pharmacology, age-appropriate resiliency and recovery support services, and natural and community supports;
- Ensuring that services are integrated and compatible as identified in the Service Plan;
- Coordinating primary, specialty, and transitional health care from ED, hospitals and psychiatric residential treatment facilities;
- Making referrals, assisting in scheduling appointments, and conducting follow-up monitoring;
- Developing self-management plans with members;
- Delivering health education specific to a member’s chronic conditions;
- Conducting a face-to-face in-home visit within two weeks of a NFLOC determination;
- Coordinating with the MCO care coordinator when a member has a NFLOC determination.

**Prevention, Health Promotion, and Disease Management**

Prevention and health promotion services are aimed at preventing and reducing health risks and providing health promoting lifestyle interventions associated with CLNM-member populations. Prevention and health promotion services address substance use prevention and/or reduction, resiliency and recovery, independent living, smoking prevention and cessation, HIV/AIDS prevention and early intervention, STD prevention and early intervention, family planning and pregnancy support, chronic disease management, nutritional counseling, obesity reduction and prevention, increasing physical activity, and improving social networks.

Health promotion activities assist CLNM members to participate in the implementation of both their treatment and medical services plans, and place strong emphasis on person-
centered empowerment to understand and self-manage chronic health conditions. Health promotion activities include, but are not limited to:

- Use of member-level, clinical data to address a member’s specific health promotion and self-care needs and goals. Some data is available from the data warehouse and assessment data in BHSDStar;
- Development of disease management and self-management plans with members;
- Delivery of health education specific to a member’s health conditions;
- Education of members about the importance of immunizations and screenings for general health conditions;
- Development and delivery of health-promoting lifestyle programs and interventions for topics such as substance use prevention and/or reduction, resiliency and recovery, independent living, STD prevention, family planning and pregnancy support, improving social networks, self-regulation, parenting, life skills, and more.
- Use of evidence-based, evidence-informed, best emerging and/or promising practices for prevention, health promotion, and disease management programs and interventions;
- Use of evidence-based, evidence-informed, best emerging and/or promising practices curricula that integrate physical and behavioral health concepts and meet the needs of the population served;
- Providing classes or counseling, which can be in a group or individual setting;
- Increasing the use of proactive health promotion and self-management activities;
- Tracking success of prevention, health promotion, and disease management programs and interventions, as well as identifying areas of improvement.

Note: MCOs and the Department of Health are potential referral sources for health promotion activities when agency and network providers cannot meet a specific health promotion need.

**Comprehensive Transitional Care**

CLNM providers are responsible for taking a lead role in transitional care. Comprehensive transitional care focuses on the movement of within different levels of care, settings, or situations. Comprehensive transitional care is bidirectional, diverting members from levels of care such as ED services, residential treatment centers, and inpatient hospitalization, and transitioning members to outpatient services. Transitional services help to reduce barriers to timely access, inappropriate hospitalizations, time in residential treatment centers, and nursing home admissions. Additionally, these services interrupt patterns of frequent ED use and prevent gaps in services which could result in (re)admission to a higher level of care or a longer stay at an unnecessarily higher level of care.
Providers of transitional services should be mindful of a member’s transition from childhood to adulthood. When developing a Service Plan providers should consider a member’s shift from pediatric to adult medical providers, or issues such as independent living arrangements. The provider agency will proactively work with CLNM members reaching the age of majority to ensure appropriate supports and services are in place in the member’s plan to assist in the successful transition to adulthood. Comprehensive transitional care activities include, but are not limited to:

- Supporting the use of proactive health promotion and self-management;
- Participating in all discharge and transitional planning activities;
- Coordinating with physicians, nurses, social workers, discharge planners, pharmacists, Indian Health Services (IHS), Tribal programs and others to continue implementing or modifying the Service Plan as needed;
- Implementing appropriate services and supports to reduce use of hospital EDs, domestic violence and other shelters, and residential treatment centers. Services should also support decreased hospital admissions and readmissions, homelessness, and involvement with State agencies such as Juvenile Justice, Protective Services, and Corrections;
- Coordinating with members as they change levels of care or providers within the same level of care to ensure timely access to subsequent services and supports;
- Sharing critical planning and transition documents with all providers involved with an individual’s care via web-based tools, secure email or hard copy;
- Facilitating critical transitions from child to adult services, or to long-term services and supports.

**Individual and Family Support Services**

Individual and family support services reduce barriers to CLNM members’ care coordination, increase skills and engagement, and improve health outcomes. Services also increase health and medication literacy, enhance one’s ability to self-manage care, promote peer and family involvement and support, improve access to education and employment supports, and support recovery and resiliency. Individual and family support activities include, but are not limited to:

- Supporting a member and their family in recovery and resiliency goals;
- Supporting families in their knowledge of a member’s disease and possible side effects of medication;
- Enhancing the abilities of members and their support systems to manage care and live safely in the community;
- Teaching members and families self-advocacy skills and how to navigate systems;
- Providing peer support services;
• Assisting members in obtaining and adhering to medication schedules and other prescribed treatments;
• Assisting members in accessing self-help activities and services;
• Arranging for transportation to medically-necessary services;
• Identifying resources for individuals to support them in attaining their highest level of health and functionality within their families and in their community
• Assessing impacts of a member’s behaviors on families, and assisting in obtaining respite services as needed.

**Referral to Community and Social Support Services**
Referrals to community and social support services help overcome access and service barriers, increase self-management skills, and improve overall health. Providers identify available and effective community-based resources and actively link and manage appropriate referrals. Linkages support the personal needs of members and are consistent with the Service Plan. Community and social support service referral activities may include, but are not limited to:

• Identifying and partnering with community-based and telehealth resources such as medical and behavioral health care, durable medical equipment (DME), legal services, housing, respite, educational and employment supports, financial services, recovery and treatment plan goal supports, entitlements and benefits, social integration and skill building, transportation, personal needs, wellness and health promotion services, specialized support groups, substance use prevention and treatment, and culturally-specific programs such as veterans’ or IHS and Tribal programs;
• Developing referral and communication protocols as outlined in MOA:
  - Referrals for partnerships with a MOA shall include acknowledgment of the referral and follow-up with the member by both participating partners. Once a referral is made, the healthcare provider also has access to relevant data on the member, including his or her CLNM assessment and Service Plan, unless the member does not authorize a data exchange.
• Making referrals and providing assistance to establish and maintain a member’s eligibility for services;
• Actively managing appropriate referrals and access to care;
• Confirming members’ and providers’ encounters and following up post-referral.

**Use of Best Practices**
The following best practices are fundamental to providing core services, all supportive services, and to facilitating the success of CLNM:

• Provide quality-driven, cost-effective, culturally-appropriate, and person- and family-centered services;
• Coordinate and provide access to high-quality healthcare services informed by evidence-based clinical practice guidelines;
• Coordinate and provide access to preventive and health promotion services, including prevention of mental illness and substance use disorders;
• Coordinate and provide access to mental health services;
• Coordinate and provide access to comprehensive care management, coordination, and transitional care across settings including facilitating transfer from a pediatric to an adult healthcare system;
• Participate in members’ discharge planning and including appropriate follow-up from inpatient to other settings;
• Coordinate and provide access to disease management, education and strategies for members with chronic illnesses and comorbidities, including providing self-management supports to members and their families;
• Coordinate and provide access to community referrals, social supports recovery services, and access to long-term care supports and services;
• Develop and maintain a Service Plan for each member to integrates the whole-person model of healthcare needs and services that is culturally appropriate for the individual;
• Demonstrate ability to use HIT to link services and facilitate communication between team members and providers;
• Establish a continuous quality improvement program and have the ability to collect and report on data to evaluate member outcomes.

Use of Health Information Technology to Link Services
The provider agency will be responsible for using HIT to link services as feasible and appropriate. The CNA, Service Plan, critical planning and transition documents, and MCO or FFS utilization information will be available to providers via BHSDStar, other web-based tools, or may be shared via secure data exchange, email or hard copy. BHSDStar is being developed in modules and is used to collect and share information for tracking and care integration. To support use of BHSDStar and other web-based data tools, the provider agency must have computers and an internet connection.

As outlined in the Health Information Technology section of this Manual, the BHSDStar data collection tool will be used to create member records specific to CLNM. BHSDStar will also provide support for the bidirectional data exchange with provider agencies’ EHR.

Target Populations
The target population of the CLNM program is individuals enrolled in Medicaid, including Medicaid recipients in FFS and MCO, who are diagnosed with one or more Serious Mental Illness (SMI) or Severe Emotional Disturbance (SED) as defined by the State of New Mexico
(criteria are listed in Appendix B, page 39). The CLNM program is being implemented in stages based on geographic location of providers. In order to be eligible for enrollment in CLNM, an individual must be enrolled in Centennial Care or Medicaid FFS, and have one or more SMI or SED. Once enrolled in this program, participants are referred to as members, but should not be confused with FFS recipient or MCO member, which refers to an individual’s type of Medicaid participation.

**Participation Requirements for Providers**

**Enrollment as a Medicaid Provider & Contracting With MCOs**

Services offered to CLNM members are furnished by a variety of providers and provider groups. A CLNM provider must first be enrolled as a New Mexico Medicaid provider and meet all applicable standards and must either update existing contracts with all Medicaid MCOs, or develop a new contract if none exists. In order to be designated a CLNM provider, applicants must also:

- Meet all provider qualifications and standards outlined in this Manual;
- Complete a CLNM application;
- Provide services in a county approved for Health Homes by the Centers for Medicare & Medicaid Services (CMS) through a State Plan Amendment (SPA);
- Successfully complete a readiness review process.

**Provider Application Process**

To apply to be a CLNM provider, an agency must complete an application that will be reviewed by the CLNM Steering Committee (please refer to p. 36 for information on the Steering Committee). The CLNM application includes the following:

- General information about the service provider;
- Description of population served;
- An overview of behavioral and physical health integration activities;
- A screening and treatment service checklist;
- A plan for provider and partner outreach and engagement;
- Additional relevant information as requested by the Steering Committee.

The applicant must also agree to comply with all Medicaid program requirements. The application can be found at the following link:

Guidelines for submitting the application can be found at the following link:
The Steering Committee will review applications to determine that a provider meets CLNM requirements. If approved, the Medical Assistance Division of Human Services Dept. will notify the applicant and arrange a readiness review assessment to be conducted by members of the CLNM Steering Committee.

**Readiness Requirements**
The Steering Committee will conduct readiness reviews with all selected applicants to evaluate their capacity to meet CLNM service requirements. The Readiness Review Protocol is comprised of the following eleven sections:

- The Health Home Population
- Health Home Referral Relationships & Network Management
- Health Home Services – Comprehensive Care Management
- Health Home Services – Care Coordination
- Health Home Services – Prevention, Health Promotion & Disease Management
- Health Home Services – Comprehensive Transitional Care
- Health Home Services – Individual and Family Support Services
- Health Home Services – Referral to Community and Social Support Services
- Staffing & Other Organizational Matters
- Integration of Physical and Psychiatric Health Consultants
- High Fidelity wrap around services

Additional readiness guidelines and information will be provided to applicants selected for site visits prior to those visits.

**Staffing Requirements**
Each provider must employ specific staff positions to meet CLNM requirements. Some positions may be hired as contractors rather than employees. Following is a list of essential positions, qualifications, and where applicable, the number of individuals required to comply with staff-to-patient ratios:

1. A **Director** specifically assigned to CLNM service oversight and administrative responsibilities;
2. A **Health Promotion Coordinator** with a bachelor’s-level degree in a human or health services field and experience in curricula development and delivery. The health promotion coordinator manages health promotion services and resources appropriate for a CLNM member such as interventions related to substance use prevention and cessation, nutritional counseling, and healthy weight management. This position also identifies gaps in disease management programming based on the specific CLNM
population.
3. **Care Coordinators**, who develop and oversee a member’s comprehensive care management and the planning and coordination of all physical, behavioral, and support services. Additionally, care coordinators, working with MCOs, are responsible for researching, investigating, and reporting grievances, appeals, and critical incidents involving a member.

Qualifications for care coordinators must be:
   a. Licensed by Regulation and Licensing Department as behavioral health practitioners, or
   b. Registered nurses licensed by the NM Board of Nursing with at least two years of relevant behavioral health experience, or
   c. Hold a bachelor’s degree and/or two years of relevant healthcare experience.

The provider agency must employ a sufficient number of care coordinators to meet the recommended ratios and the needs of members. Recommended ratios for care coordinators to members are:

- **Care Coordination Level 6** - chronic conditions not yet stabilized: 1:51–1:100;
- **Care Coordination Level 7** - multiple chronic conditions with few self-management skills: 1:30 – 1:50;
- **Care Coordination Level 8** – Pending evaluation: 1:50
- **Care Coordination Level 9** – High Fidelity Wrap Around – 1:8 - 1:10

Individual caseloads for each care coordinator may vary based on the needs of individual members and distance from the practice a care coordinator must travel to serve members.

4. A bilingual **Community Liaison** who speaks a language used by a majority of non-fluent English-speaking CLNM members, and who is experienced with resources in a member’s local community. The community liaison works with a member and their care coordinator to identify, connect, and engage with appropriate and needed community services, resources, and providers, including IHS and Tribal programs.

5. **Certified Peer Support Workers** (CPSW) and **Family Peer Support Workers** (FPSW) with lived experience are trained and certified by the State. While peers and family members will provide a number of individual and family support services, they can also be employed on a contract basis or full-time for other positions for which they are qualified. Following is contact information for entities that can help connect providers with peer and family support workers: New Mexico Credentialing Board for Behavioral Health Professionals (info@nmcbbhp.org); BHSD’s Office of Peer Recovery and Engagement (opre.bhsd@state.nm.us), and CYFD’s Behavioral Health Services (Nicole.MontoyaJones2@state.nm.us).

6. A **Supervisor** of care coordinators, community liaison, family and peer support specialists, health promotion coordinator, and any other direct care staff, who is an
independently-licensed behavioral health practitioner as described in 8.321.2 NMAC. The supervisor must have direct service experience in working with both adult and child populations.

7. A **Physical Health Consultant** who is a physician licensed to practice medicine (MD) or osteopathy (DO), a licensed certified nurse practitioner (CNP), or a licensed certified nurse specialist (CNS) as described in 8.310.3 NMAC.

8. A **Psychiatric Consultant** who is a physician (MD or DO) licensed by the Board of Medical Examiners or Board of Osteopathy and is board-eligible or board-certified in psychiatry as described in 8.321.2 NMAC.

A provider that delivers both physical health and behavioral health services on-site may already employ required staff. Examples include: nurses, physician’s assistants, pharmacists, social workers, nutritionists, dietitians, Tribal practitioners, licensed complementary and alternative medicine practitioners and exercise specialists. These specialized staff members may also provide services even if not co-located, however these services are not required.

**Data Requirements**

The CLNM provider agency is responsible for collecting data that tracks care integration services, opt in/opt out affirmations, member authorized data sharing agreement information, assessments, CLNM Service Plans, and procedures for a continuous quality improvement program. Data must be sufficient to fully inform ongoing quality measurements and include an evaluation of coordination of care and chronic disease management on individual-level clinical outcomes, experience and quality of care outcomes, at the population level. Eight health home quality indicators are mandated by CMS, and additional state-defined criteria are outlined in the quality section of this Manual.

Providers will use the web-based tool, BHSDStar for data collection and reporting. BHSDStar tracks multiple measures on members, including assessments, the CLNM Service Plan, referrals and call tracking, opt-in/opt-out affirmed status and data sharing agreement information. To support use of this and other web-based data tools, the provider agency must have computers with an internet connection. Additional information on entering data into BHSDStar and Omnicaid systems can be found in the HIT Section of this manual on page 30, and in the attachment for data entry in BHSDStar and Omnicaid.

**Health Home Operations**

**Identifying Members**

Individuals identified for enrollment in CLNM will meet the following criteria:

1. Be a Medicaid enrollee in a “full” program eligibility category (excluding partial coverage in family planning, Emergency Medical Services for Aliens (EMSA), and
Qualified Medicare Beneficiaries), including FFS recipients or MCO members, who are 18 years of age or older and meet the criteria for SMI; or
2. Be a Medicaid enrollee in a “full” program eligibility category including FFS recipients or MCO members, who are under age 18, or 21 years of age if services were received prior to age 18, who meets criteria for SED.

The criteria for SMI and SED diagnoses can be found in Appendix B, page 39 of this Manual. Individuals eligible for enrollment in CLNM will be broadly identified by HSD, MCOs, CLNM providers, community members, and ED. Following are additional enrollment considerations:

- A Medicaid recipient can participate in CLNM if he or she is in FFS or Managed Care;
- A member cannot be enrolled with more than one CLNM Health Home simultaneously;
- An MCO is not allowed to enroll a Medicaid recipient into CLNM — the CLNM provider will complete this task.

Enrolling Members

Members who meet eligibility criteria for CLNM will either be automatically uploaded to the BHSDStar registration system or be referred via e-mail to a CLNM provider as new members are identified by MCOs or other referring entities. Eligible individuals must agree to opt-in to CLNM no later than 90 calendar days from notification of the automatic upload or referral by signing an opt-in form. Medicaid recipients may also contact participating providers, their assigned MCO, or HSD to determine if they are eligible for CLNM services.

Though enrollment can occur at any time within a calendar year, opting out can only occur on a member’s enrollment anniversary date, except in the following circumstances:

- During initial registration interview, when an enrollee may decide they are not interested;
- If they no longer meet the SMI or SED criteria, e.g. have stabilized with no functional impairments;
- Have moved away from the area;
- Have lost Medicaid eligibility;
- Are dissatisfied with the program and request a panel decision to transfer their care coordination to the MCO or, if FFS, discontinue care coordination. The panel will consist of the CLNM provider staff and the relevant MCO.

Enrollment of Centennial Care Members

Phase 1:

For members enrolled in Centennial Care who are eligible for CLNM services, and have already engaged with a CLNM provider, the MCO and the provider will identify and contact
these individuals for enrollment in CLNM. The MCO will send a form letter cobraided by the MCO and MAD to the individual, informing them of CLNM and their enrollment in the program. If the letter is returned to the MCO as undeliverable, the MCO will send the returned letter to the provider agency, which is responsible for making address corrections and resending enrollment information to members.

**Phase 2:**

*For counties in which there is only one CLNM Health Home*

MCOs and providers will work to engage and enroll those current MCO members potentially eligible for CLNM services who *have not engaged directly with a CLNM provider.* In these cases, the MCO will send a letter to members who live in an eligible county and have a behavioral health diagnosis within the SMI/SED criteria. The letter will inform them of the CLNM program, their potential eligibility, and that they will be contacted by the provider to describe the program and determine their interest in participating. Simultaneously, the list of potential CLNM members will be uploaded to BHSDStar and they will be identified as a “registrant.”

Providers will contact MCO members to arrange an appointment for an evaluation and to determine eligibility and interest. Providers will opt-in members who express interest in participating. If the provider is unable to contact these individuals, or the member is uninterested in the program, the provider will opt them out. Both types of determinations will go through Omnicaid to the MCO on a nightly basis, and the MCO will either transfer care coordination to the CLNM provider or keep care coordination within the MCO, whichever is applicable. Those who do not meet the SMI/SED criteria after evaluation will be advised that they will continue to receive care coordination services through the MCO. Upon permission from the MCO member, the provider will transmit clinical records to the MCO advising them there was no SMI/SED.

For individuals newly enrolled in Centennial Care who have had an HRA and potentially meet qualifications for participation in CLNM, the MCO will inform the member they are a candidate for the CLNM program, and will refer the individual to the provider for evaluation. MCOs will follow the process previously described, but rather than having an individual automatically uploaded into BHSDStar, they will e-mail a referral to the CLNM provider.

*For counties in which there is more than one CLNM Health Home*

The MCO will send a letter to members living in an eligible county who have a behavioral health diagnosis within the SMI/SED criteria. The letter will inform them of the CLNM program, their potential eligibility, and that they will be contacted by the provider of their choice to introduce the program and ascertain their interest in participating. The letter will contain a brief description and location of each health home in their county, and request they contact HSD to select a provider. HSD staff will refer individuals to the
appropriate provider, and place the member on a referral list for the chosen provider. The list will be uploaded to BHSDStar with new referrals described as registrants. From that point forward, the process described above should be implemented.

**Enrollment of FFS Recipients**

For Medicaid recipients enrolled in FFS who are eligible for CLNM services and *have already engaged with a provider agency*, the provider will be responsible for identifying and contacting the individual for enrollment in CLNM. Registration information will be interfaced in the registration module of the BHSDStar system. Providers will contact them to describe the benefits of CLNM and encourage participation in the program. The provider will then either opt the registered FFS member in or out of CLNM through the BHSDStar activation module.

**Medicaid recipients enrolled in FFS Medicaid who are not engaged with a provider**

*For counties in which there is one CLNM provider*

HSD will send a letter to recipients who live in an eligible county and have a behavioral health diagnosis within the SMI/SED criteria to inform them of the CLNM program and their potential eligibility. The letter will advise individuals that they will be contacted by the area provider to introduce the program and determine their interest in participating. Simultaneously, the list of potential CLNM members will be uploaded to the BHSDStar system and individuals described as “registrant.” The provider will contact recipients to arrange an appointment for an evaluation to determine eligibility and interest. Providers will opt in referred individuals identified through this process who wish to participate. If a provider is unable to contact an individual, or the member is uninterested in the program, the provider will opt them out.

An individual’s “activation status” is documented in the BHSDStar “activation module” and transmitted to BHSDStar/Omnicaid on a nightly basis.

*For Counties in which there is more than one CLNM provider*

HSD will send a letter to recipients who live in an eligible county and have a behavioral health diagnosis within the SMI/SED criteria to inform them of the CLNM program, their potential eligibility, and a description of each CLNM provider in the county. The letter will advise the member they can be referred to any providers on the list, and that they will receive a call to follow-up on their interest in the program and choice of providers. Those interested will be referred to the appropriate provider and advised they will be contacted to schedule an appointment. HSD will add those who wish to participate to a registration list for the selected provider, and the list will be uploaded to BHSDStar. From that point forward, the process described on the top of page 20 should be implemented.
**Enrollment of Walk-in Clients**

Individuals who are not CLNM members and are being seen for the first time by a CLNM provider should be screened to determine their potential eligibility for the program. The provider may introduce CLNM and opt the individual in if they are interested and eligible. This communication will be provided to the MCO.

**Registered Members that cannot be located**

Centennial Care enrollees who meet CLNM eligibility criteria and have been automatically registered have 90 days to opt-in to the program. However, circumstances may arise when the provider agency fails to make contact with the member to receive an affirmative program opt-in. If, after 90 days of good faith efforts to contact a member, the provider agency is unable to locate the member, the provider agency is to follow the opt-out process in BHSDStar. The provider agency should also note in BHSDStar that they were unable to contact the member.

If an eligible individual refuses to sign consent forms or data sharing agreements necessary to share confidential information with and among providers, the provider agency should inform the individual that information sharing is necessary for their care management. If the individual still refuses to sign the agreement, the provider agency has the option of opting-out this member. The provider agency should note the reason for the opt-out in BHSDStar.

A form documenting that CLNM members have affirmatively agreed to opt-in to CLNM must be retained on file in order to receive reimbursement for delivery of CLNM services. The activation information can be entered in BHSDStar at any time, and will be automatically transmitted to the Omnicaid system and subsequently to the MCO on a daily basis, however, the effective date of enrollment can only be the first day of a month. It is the responsibility of the provider agency to communicate this information to potential CLNM members. If the delivery of services, including a diagnostic evaluation to determine eligibility, occurs before enrollment or before the first day of the month, the CLNM agency will bill the MCO or Conduent for each service rendered.

**Information from MCO to provider upon member enrollment**

In cases where the MCO is already providing services to the CLNM member, the following documents/information may be transferred from the MCO to the CLNM via the DMZ file or secure e-mail, or any other secure method the two parties have agreed upon. If the information is unavailable, the MCO is to note the reason such as, “CNA not completed” or “no signed release of information.”
Documents to be transferred to providers:
- History & physical
- Individualized Service Plans
- Health Risk Assessment
- Comprehensive Needs Assessments
- Functional Assessment
- Current MCO Care Plan
- Emergency & Back-up Plan
- Behavioral Health – Co-management Summary Notes
- Client Contact Special Considerations
- Care Coordination Plans for Individuals with Special Health Care Needs (ISHCN)
- Advance Directive

Disenrolling Members
Every CLNM member has the right to opt out of the program at the end of their enrollment anniversary. Opting out from CLNM does not affect an individual’s access to services, with the exception of CLNM-specific services offered only to participants in the health home program. A form documenting that Medicaid recipients have elected to opt out of CLNM must be retained on file. To disenroll, a member must contact the CLNM provider, who will enter the opt-out information in the BHSDStar activation module. The BHSDStar interface will transmit this information to Omnicaid, which will then transmit the information to the pertinent MCO. Medicaid members who choose to disenroll from CLNM will receive care coordination services from the MCO. The MCO will also change the member’s care coordination level back to a “2” or “3”. Additionally, the CLNM provider will work with the MCO to deliver a “warm transfer” of the individual to the MCO to assume or resume its care coordination activities.

Disenrollment can also occur when a CLNM member no longer meets the program’s eligibility criteria, such as a member losing Medicaid eligibility. A provider may discover this by verifying eligibility during a service appointment. The member may or may not notify the provider agency or its provider network of a change in eligibility. Once a provider establishes a member’s ineligibility, the provider will immediately disenroll the individual in BHSDStar with an effective end date of the end of that month. This will be communicated to the MCO through the Omnicaid roster update.

Service Accessibility for CLNM Members—Hours of Operation
Each provider shall have a plan for providing necessary care coordination services outside of regular business hours (9:00 AM – to 5:00 PM). “Outside of regular business hours” operations mean compliance with Section 8.321.2 of New Mexico Administrative Code (NMAC). This section states that a specialized behavioral health provider “must maintain
appropriate staff available on a 24-hour basis to respond to crisis situations, determine the severity of the situation, stabilize the Medicaid eligible recipient, make referrals as necessary and provide follow-up to the Medicaid eligible recipient.” CLNM members should be provided with information about how to reach their care coordinator or other qualified member of the CLNM team in an emergency situation that may occur evenings or weekends.

**HIPAA**

The provider agency must comply with applicable provisions of the federal Health Insurance Portability and Accountability Act (HIPAA, P.L. 104-191). This includes, but is not limited to, the requirement that the provider agency’s management information system (MIS) complies with applicable certificate of coverage, data specifications, and reporting requirements promulgated pursuant to HIPAA. The provider agency must also comply with HIPAA electronic data interchange (EDI) requirements and notification requirements, including those set forth in the federal Health Information Technology for Economic and Clinical Health Act (HITECH Act, P.L. 111-5).

The provider agency shall notify the MCO and HSD of all breaches or potential breaches of unspecified PHI, as defined by the HITECH Act, without unreasonable delay and in no event later than thirty (30) calendar days after discovery of the breach or potential breach. If, in HSD’s determination, the CLNM provider has not provided notice in the manner or format prescribed by the HITECH Act, HSD may require the provider to provide such notice.

**Disclosure and Confidentiality of Information**

**Confidentiality**

The provider agency, its employees, agents, consultants or advisors must treat all information obtained through a CLNM provider’s delivery of services including, but not limited to, information relating to CLNM members, potential recipients of HSD and the associated providers, as confidential information to the extent that confidential treatment is provided under State and federal law, rules, and regulations.

The provider is responsible for understanding the degree to which information obtained through the performance of this service is confidential under State and federal law, rules, and regulations.

The provider and all consultants, advisors or agents shall not use any information obtained through performance of this service in any manner except as is necessary for the proper discharge of obligations and securing of rights under this service.

Within 60 calendar days of the effective date of service implementation, the provider shall develop and provide to the CLNM Steering Committee for review and approval written policies and procedures for the protection of all records and all other documents deemed confidential.
Any disclosure or transfer of confidential information by the provider will be in accordance with applicable law. If the provider receives a request for information deemed confidential under this Agreement, the provider will immediately notify the MCO or MAD of such request, and will make reasonable efforts to protect the information from public disclosure.

In addition to the requirements expressly stated in this Section, the provider shall comply with any policy, rule, or reasonable requirement of HSD that relates to the safeguarding or disclosure of information associated with CLNM members, the provider’s operations, or the provider’s performance of this service.

In the event of the expiration of this service or termination thereof for any reason, all confidential information disclosed to and all copies thereof made by the provider shall be returned to HSD or, at HSD’s option, erased or destroyed. The provider agency shall provide HSD with certificates evidencing such destruction.

The provider’s contracts with practitioners and other providers shall explicitly state expectations about the confidentiality of HSD’s confidential information and CLNM member records.

The provider shall afford CLNM members and/or representatives the opportunity to approve or deny the release of identifiable personal information by the provider agency to a person or entity outside of the provider, except to duly authorized providers or review organizations, or when such release is required by law, regulation or quality standards.

The obligations of this Section shall not restrict any disclosure by the provider pursuant to any applicable law, or under any court or government agency, provided that the provider shall give prompt notice to HSD of such order.

*Disclosure of HSD’s Confidential Information*

The provider will immediately report to HSD and MCOs as appropriate, any and all unauthorized disclosures or uses of confidential information of which it or its consultants or agents is aware or has knowledge. The provider acknowledges that any publication or disclosure of confidential information to others may cause immediate and irreparable harm to HSD and may constitute a violation of State or federal statutes. If the provider, its consultants or agents should publish or disclose confidential information to others without authorization, HSD will immediately be entitled to injunctive relief or any other remedies to which it is entitled under law or equity. HSD will have the right to recover from the provider all damages and liabilities caused by or arising from the providers’, its representatives’, consultants’, or agents’ failure to protect confidential information. The provider will defend with counsel approved by HSD, indemnify and hold harmless HSD from all damages, costs, liabilities, and expenses caused by or arising from the providers’, representatives’, consultants’ or agents’ failure to protect confidential information. HSD will not unreasonably withhold approval of counsel selected by the CLNM Health Home.
The provider will require its consultants and agents to comply with the terms of this Section.

**Member Records**
The provider shall comply with the requirements of State and federal statutes, including the HIPAA requirements set forth in this Agreement, regarding the transfer of CLNM member records.

The provider shall have an appropriate system in effect to protect substance abuse CLNM member records from inappropriate disclosure in accordance with 42 U.S.C. § 300x-53(b), and 45 C.F.R. § 96.13(e).

If this Agreement is terminated, HSD may require the transfer of CLNM member records, upon written notice to the provider, to another entity, as consistent with federal and State statutes and applicable releases.

The term “member record” for this Section means only those administrative, enrollment, case management and other such records maintained by the provider and is not intended to include patient records maintained by participating contract providers.

**Requests for Public Information**
When the provider produces reports or other forms of information that the provider believes consist of proprietary or otherwise confidential information, the provider shall clearly mark such information as confidential information or provide written notice to HSD that it considers the information confidential.

If HSD receives a request, filed in accordance with the New Mexico Inspection of Public Records Act (IPRA), NMSA 1978, 14-2-1 et seq. seeking information that has been identified by the provider as proprietary or otherwise confidential, HSD will deliver a copy of the IPRA request to the provider.

**Unauthorized Acts**
Each Party agrees to:

- Notify the other Parties promptly of any unauthorized possession, use, or knowledge, or attempt thereof, by any person or entity that may become known to it, of any confidential information or any information identified as confidential or proprietary;
- Promptly furnish to the other parties full details of the unauthorized possession, use, or knowledge, or attempt thereof, and use reasonable efforts to assist the other Parties in investigating or preventing the recurrence of any unauthorized possession, use, or knowledge, or attempt thereof, of confidential information;
- Cooperate with the other Parties in any litigation and investigation against third parties deemed necessary by such party to protect its proprietary rights; and
- Promptly prevent a recurrence of any such unauthorized possession, use, or knowledge of such information.

Effective 9/01/17
Information Security
CLNM and all its consultants, representatives, providers and agents shall comply with all applicable statutes, rules, and regulations regarding information security, including without limitation the following Centennial Care Agreement Requirements:

7.26.6.1.1 Health and Human Services Enterprise Information Security Standards and Guidelines;
7.26.6.1.2 HIPAA;
7.26.6.1.3 HITECH Act;
7.26.6.1.4 NMAC 1.12.20 et seq.

Referrals and Communication
The provider agency is required to meet the integrated physical, behavioral, and long-term health needs of its CLNM members by partnering with physical and behavioral health providers, support service agencies, and long-term care providers. This will require referral and communication protocols, which in some cases, are to be outlined in MOAs. MOAs are required for the following: at least one primary care practice in the area that serves members less than 21 years of age; at least one primary care practice that serves members age 21 and older; local hospitals, and residential treatment facilities. MOAs are not required for support services agencies such as food banks.

MOA and other referral and communication protocols will be submitted to the Steering Committee for review as part of the application or readiness review process. For partnerships that require MOA, the referral process shall include acknowledgment of the referral and follow-up with the member by both participating partners. Once a referral is made, the provider also has access to relevant data on the CLNM member, including his or her Service Plan, unless the member does not authorize such data exchange.

For example, if a member is referred for follow-up primary care, the provider will work with the CLNM member and its primary care partner to schedule follow-up care. Once the referral is finalized, the primary care office will have access to relevant health data on the member, and will provide necessary follow-up care. If after-care is scheduled, the provider will confirm that the appointment occurred and check on outstanding care or treatment issues that arose during the appointment. As part of the provider’s reporting requirements, the communication loop of referrals and follow-up will continue to be tracked.

For partnerships where MOA are not required, a good faith effort should be made by the provider to ensure that support services are delivered. The provider agency must identify available community-based resources and actively manage appropriate referrals and access to care, engagement with other community and social supports, and follow-up activities post-engagement. Common linkages include assistance with continuation of healthcare benefits eligibility, disability benefits, housing, legal services, educational supports,
employment supports, IHS and Tribal programs, DME, and other personal needs consistent with recovery goals and the Service Plan. The care provider or care coordinator will make referrals to community services, link clients with natural supports and ensure that these connections are solid and effective. For referrals such as DME, a care coordinator will work with the member’s physical health providers and MCO to obtain necessary equipment. Care coordinators are responsible for documenting outcomes of referrals, including notation of follow-up activities and any additional recommendations resulting from referrals.

**Grievances and Appeals**

CLNM care coordinators will be responsible for assisting members with appeals and grievances, including, but not limited to, explaining the right of appeals process and reporting grievances. Coordinators will contact a member's MCO and/or HSD for instructions on the process for filing a grievance or appeal, including timeframes and contact information. Procedures for grievances and appeals shall follow the requirements described in 8.308.15 NMAC.

**Critical Incident Reporting**

All providers delivering Medicaid-funded services to individuals receiving Home- and Community-Based Services, including CLNM providers, are required to report critical incidents. The MCO is required to research and investigate the critical incident and will collaborate with the care coordinator to fulfill this requirement for critical incident reports involving members. New Mexico State statutes and regulations define the expectations and legal requirements for properly reporting recipient-involved incidents in a timely and accurate manner. The provider agency is responsible for understanding and complying with these requirements.

To assist providers in understanding and complying with critical incident reporting, the “Critical Incident Management Guide and Critical Incident Training Guide” is available at: https://criticalincident.hsd.state.nm.us/Default.aspx. To obtain passwords and access to the reporting portal, email the HSD Critical Incident team at: HSD- QB-CIR@state.nm.us

**MCO Role**

The MCO will serve a complementary, but not duplicative, role in the delivery of CLNM services. The MCO role begins with identifying and contacting their members who meet CLNM eligibility requirements and referring interested MCO members to providers for enrollment in CLNM. Additionally, MCOs are responsible for:

- Conducting initial HRA for members, including initial recommendations and referrals to CLNM providers;
- Conducting the NFLOC assessment, including the Centennial Care Community Benefit Service Questionnaire (CBSQ) with the CLNM care coordinator, and providing results to be incorporated into Service Plan. Please refer to the NFLOC section below for
more information;
- Processing prior authorization requests from CLNM providers;
- Processing and oversight of all CLNM member claims and/or encounter data;
- Establishing per-member-per-month (PMPM) payment agreements on the pass through of care coordination reimbursements from the State to the provider agency.

MCOs are also responsible for developing a contract amendment template to be used to amend MCO contracts with CLNM providers. The contract amendment template should include the following information: that CLNM members are excluded from the MCO care coordination ratio requirements; varying timelines are allowed for completing a CNA and Service Plan for CLNM members, and HRA requirements for the MCO are waived if the HRA has not been completed.

Emergency Department, Inpatient Admissions and Residential Services
CLNM providers are responsible for taking a lead role in transitional care activities for members, including interrupting patterns of avoidable hospital ED use, inpatient stays and unplanned readmissions. Provider agencies will work with additional healthcare providers and CLNM members to support proactive health promotion and self-management – activities that help ensure timely follow-up appointments, prevention of non-emergency use of the ED, and unplanned readmissions. When a member uses ED services, participating hospitals are required by Section 2703 of the ACA to refer the patient to a provider agency. Referral protocols should be established in MOA with hospitals in the geographic vicinity. MCOs will provide a daily hospital census from participating facilities to providers to assist in monitoring CLNM member utilization.

Nursing Facility Level of Care (NFLOC)
In some cases, providers may serve CLNM members who meet criteria for a NFLOC. If a CNA indicates that a member may qualify for community-based long-term services and supports, the care coordinator must ask the member if they wish to be evaluated for a NFLOC. The MCO will identify indicators that may signal a member’s eligibility eligible for NFLOC, and relay that information to the provider. If the member is interested in a NFLOC evaluation, the CLNM care coordinator shall arrange for the evaluation with the assigned MCO, and will accompany the MCO care coordinator to the appointment with the member. If an FFS recipient is in need of a NFLOC assessment for long-term services and supports, the State requires that the member must enroll with an MCO.

Factors that might indicate a member may be eligible for a NFLOC designation include the following:
- The individual has a cognitive or physical impairment that limits abilities to complete activities of daily living independently, such as getting dressed, bathing, grooming, eating, and acquiring or preparing food. Mobility and incontinence issues may also be
The MCO will be responsible for completing a NFLOC assessment, including the Centennial Care Community Benefit Service Questionnaire, for those CLNM members who qualify for Community Benefit Services. If NFLOC services are indicated, the MCO will be responsible for completing the allocation tool which is used to determine the number of hours of personal care services a member receives. The MCO will also develop the community benefit care plan. MCOs will provide the NFLOC assessment and care plans to the CLNM provider to coordinate and monitor utilization of Community Benefit Services. When a NFLOC is established, the care coordinators from the MCO and CLNM provider agency will jointly conduct a home assessment. If the member is eligible for self-directed care, the MCO will retain the self-directed care budget, but the CLNM care coordinator will conduct the care management and care coordination.

The MCO will conduct a NFLOC reassessment at least annually. A NFLOC reassessment shall also be conducted within five business days of learning of a change in a member’s functional or medical status. The CLNM care coordinator is responsible for tracking these dates and ensuring communication regarding the member’s needs.

CLNM members who meet the NFLOC designation have access to community-based long-term services and supports including:

- Community Benefits as deemed appropriate based on the CNA;
- The option to select either the Agency-Based Community Benefit or the Self-Directed Community Benefit. Members who select the Agency-Based Community Benefit will have a choice of using the consumer-delegated model or consumer-directed model for personal care services.

The CLNM care coordinator shall be familiar with these benefits and ensure the member’s choices are reflected in the member’s Service Plan. While the MCO is responsible for the NFLOC assessment, the CLNM care coordinator should be aware that, the MCO must complete the CNA and NFLOC determinations within 60 calendar days of the Primary Freedom of Choice (PFOC). The MCO is also responsible for ensuring that the CNA process is initiated within 120 days of the NFLOC-determination expiration.

**Health Information Technology**

The BHSDStar web-based data collection tool is used to create HIT linkages for provider agencies and ancillary care providers. BHSDStar collects information on CLNM members including registration, care coordination (with call tracking and referrals), assessments, Service Plans, and quality tracking. These resources will be available to CLNM providers to
collect, record all information relevant to a member’s care, including unmet needs, gaps in care, or transitional support requirements.

In addition to the Star system, HSD will be using Medicaid Management Information System (MMIS) data elements for the purpose of CLNM enrollment. To support use of BHSDStar and other web-based data tools, the provider agency must have computers and an internet connection.

**BHSDStar Modules**

**Registration and activation modules**

These sections of the modules are used to enter levels of care coordination. Please refer to attachment 1, which details data entry for these modules.

**Client Services Module**

Provider staff members will use this module to track activities contained within the six required core services. The module will contain a checklist of all activities within each of the six services, and a field for staff to record time spent conducting each activity. A table on page 34 of this Manual lists CLNM procedural codes for billing. A “reminder” tracking application for provider staff and their clients will help staff organize their activities based on time allocations they have established when planning care activities.

**CLNM Comprehensive Needs Assessment**

This standardized CNA will be automated by BHSDStar, and has varying levels of security (permissions) reflective of which staff members have access to information. Access is based on the status of the relationship (existing MOA) and the member’s consent.

**CLNM Service Plan**

This is the standardized plan of service developed by HSD to be utilized by all CLNM providers and automated in BHSDStar. It has varying levels of security (permissions) reflective of which staff members have access to the information. Access is based on the status of the relationship (existing MOA) and the member’s consent.

**Quality**

The provider agency is responsible for collecting and using data that supports a continuous quality improvement program. Data must be sufficient to fully inform the following:

- Ongoing quality measurements;
- An evaluation of coordination of integrated care and chronic disease management on individual-level clinical outcomes;
- Experience of care outcomes;
- Quality of care outcomes at the population level.

Effective 9/01/17
Please see the “Quality and Outcomes” section on page 35 for more information. Appendix C of this manual (page 44) contains evaluation criteria for the CLNM program.

**EDIE PreManage**
Emergency Department Information Exchange software automatically sends real time notifications to CLNM providers when patients present at the ED. The content of the notification includes a patient’s social information and clinical ED history, and care guidelines. New Mexico MCOs sponsor the EDIE program to help monitor and improve the quality of essential ED visits and potentially reduce unnecessary readmissions.

**PRISM Risk Management**
PRISM, a risk management application based on 15 months of rolling claims data affords CLNM providers with options to target care management services based on predictive risk scores and utilization data. Using this tool, care coordinators can review the relationship between PRISM predictive risk scores and alternative methods of targeting based on prior ED or inpatient utilization patterns. Considerations include further prioritizing engagement within the target population, or use of predictive risk scores to differentiate levels of care coordination intensity, with corresponding staffing ratio targets.

**Meaningful Use**
A core service of the CLNM program is the use of HIT to link services for members. To facilitate the use of HIT, CLNM providers are expected to adopt meaningful use practices outlined by the Office of the National Coordinator (ONC). ONC defines “meaningful use” as the use of EHR technology to:

- Improve quality, safety and efficiency, and reduce health disparities;
- Engage patients and families;
- Improve care coordination, and population and public health;
- Maintain privacy and security of patient health information.

Provider agencies will adopt meaningful use of HIT to:

- Improve clinical outcomes;
- Improve population health outcomes;
- Increase transparency and efficiency;
- Empower individuals;
- Improve research data on health systems.

**Health Home Reimbursement**

**PMPM**
CLNM providers are reimbursed through a per-member per-month (PMPM) payment specific to each CLNM provider. CLNM-dedicated services include the six core service
categories that are not duplicative of Centennial Care services. A provider will bill for the approved list of CLNM core services using the CMS 1500. Additional Medicaid-covered services provided to members are billed and reimbursed separately from the approved list of CLMN core services.

The PMPM rate will be updated annually based upon results of analyses, including claims experience. HSD reserves the right to update PMPM rates as deemed necessary. The PMPM reimbursement is paid for each CLNM member, regardless of whether the member is enrolled with an MCO or in FFS Medicaid. The provider is responsible for verifying a member’s affirmative agreement to participate and opt-in for CLNM services. In order to be reimbursed, providers must retain a signed opt-in statement in a member’s file.

**Billing Instructions**

- For reimbursement of the PMPM, the G9001 or G9003 code must be billed with one other service code listed in the table below on the same claim;
- The six services codes shall be billed with a $0.01 price indicated, but will pay $0.00;
- All service codes are to be billed with the actual dates of service and correct time units;
- The facility NPI may be used in the rendering provider field as well as in the billing provider field;
- FQHCs that will bill other services utilizing a UB claim form and a revenue code shall bill the CLNM codes on a CMS 1500 claim form using HCPCS codes listed below. FQHC will need to obtain a separate NPI and facility ID for CLNM services;
- IHS and 638 tribal facilities will be billing other services utilizing the OMB rate, and shall bill CLNM codes on a CMS 1500 claim form utilizing the above HCPCS codes.

Codes for common CLNM-approved services are listed below. Each month, G9001 and/or G9003 codes and one or more of the six CLNM core service codes listed below must be rendered and claimed in order to receive a PMPM payment for that month.
## CareLink NM Health Care Common Procedure Coding System (HCPCS) codes

| S0280 |          | **Comprehensive Care Management (CCM)**  
Identify high risk individuals to ensure individuals and their families actively participating in the CNA and service planning. Monitor the implementation of the Service Plan and: 1) evolution into member’s health care and self-management; 2) use of services; 3) prioritization of transitional care activities. Assign appropriate CLNM team to lead member’s care. | 15 minutes  |
| T1016 | U1       | **Care Coordination (CC)**  
Assigned team leaders coordinate activities of team and local providers to implement the Service Plan. Reinforce treatment strategies to increase the individual’s motivation to actively self-manage chronic health conditions. | 15 minutes  |
| T1016 | U2       | **Comprehensive Transitional Care**  
Maximize a member’s ability to live safely in the community and minimize the use of out-of-home placements and ED. Assure continuation of the treatment plan across all levels of care such as early discharge planning and proactive prevention of avoidable readmissions. Require effective point-of-service exchange of information, including medication reconciliation and access. | 15 minutes  |
| T1016 | U3       | **Individual and Family Support**  
Assist members to attain the highest level of health and functionality within the family and broader community. Ensure individual engagements support recovery and resiliency, and involve peer, family and other support groups, Tribal programs, and formal self-care programs as needed. | 15 minutes  |

| T1016 | U4       | Referral to Community and Social Support Services  
Identify available community-based resources and actively manage appropriate referrals. Engage other community and social supports, and follow up post-engagement. Referral may include service providers for: disability benefits, housing, IHS and Tribal programs, legal services, and other personal needs consistent with recovery goals and treatment plans. | 15 minutes  |
| T1016 | U5       | Prevention and Health Promotion  
Coordinate individual, group and environmental strategies aimed at disseminating information to support healthy living and reducing health consequences associated with chronic conditions such as substance abuse prevention, smoking prevention and cessation, nutritional counseling, obesity reduction and prevention and increasing physical activity. | 15 minutes  |
| G9001 |          | Coordinated care fee                                                                                 | Capitation PMPM |
| G9003 |          | Coordinated care fee – high risk for high fidelity wraparound services                               | Capitation PMPM |

**Quality & Outcomes**

Quality and health outcome measures of CLNM members are crucial. In addition to being a federal requirement of the Health Home program, measurements also provide essential information to the State and eligible providers on program impact to support the underlying goals of the program.

The Steering Committee will assess program implementation indicators from enrollment data, member engagement, claims/encounter data, member assessment data, and interim progress reports from the provider agency.

HSD will monitor a set of core health measurements to evaluate health outcomes of CLNM members. The following table lists required health performance measures, whether the data is recorded as a quality of care process, a health outcome, prevention and health promotion...
criteria, experience of care, or utilization and cost data. Please note the table is organized by the following five overriding goals of the CLNM program:

1. Promote acute and long-term health;
2. Prevent risk behaviors;
3. Enhance member engagement and self-efficacy;
4. Improve quality of life for individuals with SMI/SED;
5. Reduce avoidable utilization of emergency departments, inpatient, and residential services.

Much of this information will be captured through providers’ use of the BHSDStar service module; other information will be collected through claims data. Quality reports will be monitored by the Steering Committee at semi-annual intervals to determine program efficacy and as the basis of corrective action plans if large gaps in health outcomes are identified. The State reserves the right to conduct additional readiness assessments based on program changes or additions over time.

Evaluation measures are listed in Appendix C on page 44.

**Compliance and Oversight**

**Steering Committee**
The Steering Committee is comprised of leaders from MAD, BHSD, CYFD, UNM Psychiatric Center, and the four MCOs, and is charged with selection of participating agencies, oversight of program implementation, and monitoring of activities. Ongoing monitoring activities include:

- Development and reassessment of risk management strategies;
- Semi-annual performance reviews of standards of care and quality indicators, including recommendation of corrective action plans when necessary;
- Evaluation of audit reports conducted by the MCOs;
- Long-term evaluation of return on investments;
- Evaluation of CLNM progress toward goals;
- Ongoing evaluation of general CLNM operations;
- Recommendation of future CLNM strategies to HSD leadership.

**Other Monitoring and Auditing**
MCOs are charged with monitoring the performance of the CLNM providers using the BHSDStar system, semi-annual reports and on-site audits as needed. Tools and measures shall be shared with providers to facilitate and foster proactive, continuous quality improvement efforts.
A CLNM member file must be maintained for each member served and must contain the following:

- A scanned copy of the member’s signed consent form;
- An initial CNA and all reassessments;
- An initial CLNM Service Plan and subsequent updates;
- Service tracking of member;
- Copies of any releases of information signed by the member;
- A list of all medical, behavioral health, and social service referrals made.

Appendix B – Criteria for SMI and SED

Criteria for Severe Emotional Disturbance Determination

Age
Less than 18 years of age, or between ages of 18 and 21, who received services prior to eighteenth birthday, was diagnosed with a SED, and demonstrates a continued need for services.

Diagnoses must meet category A or B below

A. The child/adolescent has an emotional and/or behavioral disability that has been diagnosed through the classification system in the current American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders (DSM). Please note: diagnoses that are included are only those providing a primary reason for receiving public system behavioral health services.
   - Neurodevelopmental Disorders (299.00, 307.22, 307.23, 307.3, 307.9, 314.00, 314.01, 315.4, 315.35, 315.39, 315.8, 315.9, 319)
   - Schizophrenia Spectrum and other Psychotic Disorders (293.81, 293.82, 295.40, 295.70, 295.90, 297.1, 298.8, 293.89, 298.8, 301.22)
   - Bipolar and Related Disorders (293.83, 296.40, 296.41, 296.42, 296.43, 296.44, 296.45, 296.46, 296.50, 296.51, 296.52, 296.53, 296.54, 296.55, 296.56, 296.89)
   - Depressive Disorders (296.99, 293.83, 296.20, 296.21, 296.22, 296.23, 296.24, 296.25, 296.26, 296.30, 296.31, 296.32, 296.33, 296.34, 296.35, 296.36, 300.4, 31, 625.4)
   - Anxiety Disorders (293.84, 300.00, 300.01, 300.02, 300.09, 300.22, 300.23, 300.29, 309.21, 300.23)
   - Obsessive-Compulsive Related Disorders (294.8, 300.3, 300.7, 312.39, 698.4)
   - Trauma-and Stressor Related Disorders (308.3, 309.0, 309.24, 309.28, 309.3, 309.4, 309.81, 309.89, 309.9, 313.89)
   - Dissociative Disorders (300.12, 300.13, 300.14, 300.15, 300.6)
   - Somatic Symptom and Related Disorders (300.11, 300.19, 300.7, 300.82, 300.89
   - Elimination Disorders (307.6, 307.7, 787.60, 788.30, 788.39
   - Disruptive, Impulse Control and Conduct Disorders (312.32, 312.33, 312.34, 312.81, 312.89, 312.9, 313.81)
   - Substance-Related and Addictive Disorders (292.9, 303.90, 304.00, 304.20, 304.30, 304.40, 304.50, 304.60, 304.90)

B. The term complex trauma describes children’s exposure to multiple or prolonged traumatic events, which are often invasive and interpersonal in nature. Complex trauma exposure involves the simultaneous or sequential occurrence of child maltreatment, including psychological maltreatment, neglect, exposure to violence and physical and
sexual abuse. In order to qualify as a complex trauma diagnosis, the child must have experienced one of the following traumatic events:

- Abandoned or neglected;
- Sexually abused;
- Sexually exploited;
- Physically abused;
- Emotional abused;
- Repeated exposure to domestic violence.

In addition to one of the qualifying traumatic events listed above, there must also be an exparte order issued by the children’s court or the district court which includes a sworn written statement of facts showing probable cause exists to believe that the child is abused or neglected and that custody is necessary.

**Functional Impairment**

The child/adolescent must have a functional impairment in two of the listed capacities:

- **Functioning in self-care**: Impairment in self-care is manifested by a person's consistent inability to take care of personal grooming, hygiene, clothes, and meeting of nutritional needs.
- **Functioning in community**: Inability to maintain safety without assistance; a consistent lack of age-appropriate behavioral controls, decision-making, judgment and value systems which result in potential out-of-home placement.
- **Functioning in social relationships**: Impairment of social relationships is manifested by the consistent inability to develop and maintain satisfactory relationships with peers and adults. Children and adolescents exhibit constrictions in their capacities for shared attention, engagement, initiation of two-way effective communication, and shared social problem solving.
- **Functioning in the family**: Impairment in family function is manifested by a pattern of significantly disruptive behavior exemplified by repeated and/or unprovoked violence to siblings and/or parents and/or caretakers (e.g., foster parents), disregard for safety and welfare of self or others (e.g., fire setting, serious and chronic destructiveness, inability to conform to reasonable expectations that may result in removal from the family or its equivalent). Child-caregiver and family characteristics do not include developmentally based adaptive patterns that support social-emotional well-being. For early childhood functioning, major impairments undermine the fundamental foundation of healthy functioning exhibited by: rarely or minimally seeking comfort in distress; limited positive affect and excessive levels of irritability, sadness or fear; disruptions in feeding and sleeping patterns; failure, even in unfamiliar settings, to check back with adult caregivers after venturing away; willingness to go off with an unfamiliar adult with minimal or no hesitation;
regression of previously learned skills;

- Functioning at school or work: Impairment in school/work function is manifested by an inability to pursue educational goals in a normal timeframe (e.g., consistently failing grades, repeated truancy, expulsion, property damage or violence toward others); identification by an IEP team as having an Emotional/Behavioral Disability; or inability to be consistently employed at a self-sustaining level (e.g., inability to conform to work schedule, poor relationships with supervisor and other workers, hostile behavior on the job).

**Symptoms**

Individuals manifest symptoms in one of the following categories:

- Psychotic symptoms: Symptoms are characterized by defective or lost contact with reality, often with hallucinations or delusions;
- Danger to self, others and property as a result of emotional disturbance: The individual is self-destructive, e.g., at risk for suicide, and/or at risk for causing injury to self, other persons, or significant damage to property;
- Mood and anxiety symptoms: The disturbance is excessive and causes clinically significant distress and which substantially interferes with or limits the child’s role or functioning in family, school, or community activities;
- Trauma symptoms: Children experiencing or witnessing serious unexpected events that threaten them or others. Children and adolescents who exposed to a known single event or series of discrete events experience a disruption in their age-expected range of emotional and social developmental capacities. Such children may experience:
  - a disruption in a number of basic capacities such a sleep, eating, elimination, attention, impulse control, and mood patterns;
  - under-responsivity to sensations and become sensory seeking, physically very active, aggressive and/or antisocial;
  - under-responsivity to sensations but not sensory seeking and may shut down further and become lethargic or depressed and difficult to arouse;
  - over-responsivity to sensations and become hyper-vigilant or demonstrate fear and panic from being overwhelmed;
  - episodes of recurrent flashbacks or dissociation that present as staring or freezing.

**Duration**

The disability must be expected to persist for six months or longer.
Criteria for Serious Mental Illness Determination

Age
The individual must be an adult 18 years of age or older.

Diagnoses
The individual must have one of the diagnoses specified in the list below as defined under the current American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders. The diagnosis would need to have been determined within the prior 12 months by an appropriately credentialed and licensed professional.

- Schizophrenia (295.90)
- Other Psychotic Disorders
  - Delusional Disorder (297.1); Schizoaffective Disorder (295.70)
  - Other Specified Schizophrenia Spectrum and Other Psychotic Disorder (298.8 )
  - Unspecified Schizophrenia Spectrum and Other Psychotic Disorder (298.9)
- Major Depression and Bipolar Disorder
  - Major Depressive Disorder (296.XX)
  - Bi-Polar Disorders (296.XX except Unspecified Bi-Polar and Related Disorder 296.80)
- Other Mood Disorders
  - Cyclothymic Disorder (301.13)
  - Persistent Depressive Disorder (300.4)
- Anxiety Disorders
  - Panic Disorder (300.01)
  - Generalized Anxiety Disorder (300.02)
- Obsessive Compulsive & Related Disorders
  - Obsessive Compulsive & Related Disorders (300.3)
- Trauma and Stressor-Related Disorders:
  - Posttraumatic Stress Disorder (309.81)
- Eating Disorders
  - Anexoria Nervosa (307.1)
  - Bulimia Nervosa (307.51)
- Somatic Symptom and Related Disorders
  - Conversion Disorder (300.11)
  - Somatic Symptom Disorder (300.82)
  - Factitious Disorder Imposed on Self (300.19)
- Dissociative Disorders
  - Dissociative Amnesia (300.12)
  - Dissociative Identity Disorder (300.14)
• Personality Disorders (for which there is an evidence-based clinical intervention)
  - Borderline Personality Disorder (301.83)

*Functional Impairment*

The disturbance is excessive and causes clinically significant distress or impairment in social, occupation, or other important areas of functioning.

*Duration*

Duration of the disorder is expected to be six months or longer.

*In order to receive a diagnosis of SMI, a person must meet one of the following criteria in Section A or Section B in addition to one of the diagnoses listed above.*

A. Symptom Severity and Other Risk Factors:

- Significant current danger to self or others or presence of active symptoms of a SMI;
- Three or more emergency room visits or at least one psychiatric hospitalization within the last year;
- Individuals with substance use disorder that complicates SMI and results in worsened intoxicated/withdrawal complications, bio medical conditions, emotional/behavior/cognitive conditions;
- Person is experiencing trauma symptoms related to sexual assault, domestic violence or other traumatic event.

B. Co-occurring Disorders

- Substance Use Disorder diagnosis and any mental illness that affects functionality;
- SMI or Substance Use Disorder and potentially life-threatening medical condition (e.g., diabetes, HIV/AIDS, hepatitis);
- SMI or Substance Use Disorder and Developmental Disability.
Appendix C - CLNM Evaluation Criteria

Domains to be evaluated:
1. Clinical & social determinants of health outcomes (OC)
2. Experience of care (EOC)
3. Quality of care (QOC)
4. Utilization of services (SU)
5. Cost of care ($)

Goal I: Prevent Risk Behaviors
Screen for common chronic conditions and risk behaviors in individuals with SMI or SED

CLNM AGENCY NAME

CARELINK NM (HEALTH HOME) PARTICIPATION AGREEMENT

I understand that I have been identified as being eligible to participate in the CareLink New Mexico (CLNM) Health Home program. The health home program is designed to help coordinate the care I receive between my Managed Care Organization (MCO), primary care provider, behavioral health provider, and any other identified health professional(s) identified through my Comprehensive Needs Assessment (CNA) and Care Plan (CP).

By participating in CLNM, I grant CLNM AGENCY NAME permission to release/disclose any and all health records including alcohol and substance abuse records covered under 42 CFR, Part 2, necessary for the purposes of registration, determination of eligibility, for coordination of care, and billing/payment purposes. By agreeing to participate, I give consent for my MCO to make available to CLNM AGENCY NAME past treatment and care coordination records. I agree to release CLNM AGENCY NAME and any related entities, employees, and directors from any and all liability related to or arising from any such release or disclosure. I understand that the information used for the above purposes will be kept strictly confidential in accordance with all federal and state privacy and confidentiality laws.

I understand that I may revoke this consent at any time; however, if I revoke my signed consent, I may no longer be eligible for services under the CLNM Health Home.

It has been explained to me that I may choose to participate in this program or to decline participation and that by declining, it will in no manner effect the current mental health or primary care services I am receiving. At this time, I am:

☐ Choosing to Participate

☐ Declining to Participate

By choosing or declining to participate in the CareLink NM Health Home program, I understand that CLNM AGENCY NAME will notify my MCO of my decision. Identified MCO:

☐ Blue Cross Blue Shield

☐ Molina Health Care

☐ Presbyterian Health Plan

☐ United Healthcare Community Plan

CLIENT or legal representative SIGNATURE: ____________________________ (Relationship to Client) ____________________________ (Date)

STAFF SIGNATURE: ____________________________________________ (Staff Name) ____________________________________________ (Date)

Effective 09/01/2017
I hereby authorize MCO NAME to disclose all health records and care coordination records. I further authorize disclosure of health information that includes information relating to:

____ initial here treatment for alcohol and/or substance abuse records
____ initial here behavioral health services/psychiatric care records
____ initial here HIV or AIDS infection or other sexually transmitted disease records

These records are for the time period of ___________________________. I understand that I have a right to revoke/cancel this authorization at any time. I understand that if I revoke this authorization I must do so in writing and give my written revocation to CLNM AGENCY NAME. I understand the revocation will not apply to information that has already been released in response to this authorization. I understand that the revocation will not apply to my insurance when the law provides my insurer with the right to contest a claim under my policy. Unless I have revoked this authorization, this authorization will expire on the following date, event, or condition: ___________________________. If I fail to specify an expiration date, event, or condition, this authorization will expire in one (1) year from the date on which it was signed.

I understand that once the above information is disclosed, it may be re-disclosed by the recipient and the information may not be protected by federal and state privacy laws or regulations.

I understand that authorizing the disclosure of this health information is voluntary; that I can refuse to sign this authorization and do not need to sign this authorization in order to obtain health care treatment, payment, enrollment, or eligibility for benefits. I understand that I have a right to a copy of this signed authorization.
