RE: LIHEAP screen modifications in Aspen to capture primary heat source and electricity vendor information
DATE: August 31, 2016

Effective October 1, 2016 changes to Aspen screens will be made to capture primary heat source and electricity vendor information.

Aspen has incorporated two new screens to capture the Primary Heat Source and Electricity vendor information as follows:

- Screen Name: Energy Usage - Details.
- This screen shall always be queued as the last screen in LIHEAP Service Request logical unit of work (LUW).
- This screen shall have the following three sections:
  - Service Details
  - Primary Heat Source Vendor
  - Electricity Vendor
- This screen shall be made read only and not editable after the LIHEAP request is certified.
- Service Account Address shall not be captured on this screen

The “Utility Type” field shall be defaulted to blank under “Utility Expense Details” section described below:

- When the Primary Heat Source answer on the “Energy Usage – Details” screen is selected as “Not Provided”, a HUMAD requesting primary heat source information shall be sent to the client.
- When the question “Applicant has Electric Account” on the “Energy Usage – Details” screen is answered as “Not Provided”, a HUMAD requesting electric information shall be sent to the client.
- A new form LHP 013 shall be generated along with the HUMAD when a LIHEAP application pends due to missing Primary Heat Source and/or Electric information.

LHP 013 and Aspen screen shots attached. If you have any questions or comments, feel free to contact Sharon Rivera at 505-827-7267 or by email at Sharoom.Rivera@state.nm.us.
