**SMI determination is based on the age of the individual, functional impairment, duration of the disorder and the diagnosis. Adults must meet all of the following four criteria:**

☐ 1. **Age:** Must be an adult 18 years of age or older.

☐ 2. **Diagnoses:** Have one of the diagnoses specified in the list below as defined under the current *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders*. The diagnosis would need to have been determined within the prior 12 months by an appropriately credentialed and licensed professional.

☐ 3. **Functional Impairment:** The disturbance is excessive and causes clinically significant distress or impairment in social, occupational, or other important areas of functioning.

☐ 4. **Duration:** Expected duration of the disorder is to be six months or longer.

**List of Diagnoses for #2 Above**
