Executive Summary
Summary Description Including Goals and Objectives The purpose of this State Plan is to exclude all wages paid by the Census Bureau for temporary employment related to census activities and is applicable to only aged, blind, and disabled (ABD) categories. New Mexico’s current SPA limits the census wage exclusion to Census 2000 activities for ABD categories. A. Eligibility Determinations of Individuals Who Are Age 65 or Older or Who Have Blindness or a Disability

Eligibility determinations of individuals who are age 65 or older or who have blindness or a disability are based on one of the following:

1. SSA Eligibility Determination State (1634 State)
   The state has an agreement under section 1634 of the Social Security Act for the Social Security Administration to determine Medicaid eligibility of SSI beneficiaries. For all other individuals who seek Medicaid eligibility on the basis of being age 65 or older or having blindness or a disability, the state requires a separate Medicaid application and determines financial eligibility based on SSI income and resource methodologies.

2. State Eligibility Determination (SSI Criteria State)
   The state requires all individuals who seek Medicaid eligibility on the basis of being age 65 or older or having blindness or a disability, including SSI beneficiaries, to file a separate Medicaid application, and determines financial eligibility based on SSI income and resource methodologies.

3. State Eligibility Determination (209(b) State)
   The state requires all individuals who seek Medicaid eligibility on the basis of being age 65 or older or having blindness or a disability, including SSI beneficiaries, to file a separate Medicaid application, and determines financial eligibility using income and resource methodologies more restrictive than SSI.

The state will apply the methodologies as described below, and consistent with 42 CFR 435.601, 435.602, and 435.831.

A. Basic Financial Methodology

1. The state applies the income and resource methodologies of the SSI program when determining eligibility for a population based on age (65 or older) or having blindness or a disability, with the exceptions described below in B. through G.

2. The state applies the financial methodologies of either the SSI program or the AFDC program in effect as of July 16, 1996 (whichever is most closely related) when determining eligibility for a population based on age (as a child), pregnancy, or status as a caretaker relative, with the exceptions described below in B. through G.

B. Use of Less Restrictive Methodologies

1. The state elects to apply income and/or resources methodologies that are less restrictive than those used under the cash assistance programs, in accordance with 42 CFR 435.601(d).

○ Yes
○ No

2. The less restrictive income and resource methodologies are described on the RU for each applicable eligibility group.
C. Financial Responsibility of Relatives

1. In determining financial eligibility for an individual, the state does not include income and resources from anyone other than the individual’s spouse, and for individuals under age 21 or who have blindness or disability, the individual’s parent.

   a. The state includes the income and resources of a spouse or parent only when they are living with the individual in the same household, except as follows:

      i. In the case of spouses who are age 65 or older or who have blindness or disability and who share the same room in a Medicaid institution, the state:

         o (1) Considers these couples either as living together or as living separately for the purpose of counting income and resources, whichever is more advantageous to the couple.

         o (2) Considers these couples as living separately for the purpose of counting income and resources.

      ii. Where applicable, the state determines income and resource eligibility consistent with the spousal impoverishment rules of section 1924 of the Act, as described in the Resource Assessment and Eligibility reviewable unit.

   b. In the case of individuals under age 21 for whom AFDC is the most closely related cash assistance program, the income and resources of parents and spouses are included only if the individual would have been considered a dependent under the state’s approved AFDC state plan in effect as of July 16, 1996.
D. Family Size

1. The family size of an individual for whom the SSI income and resource methodologies are used (as described in section A) includes the persons identified below:
   a. The individual applying, or
   b. If the individual lives together with his or her spouse, the individual applying and the spouse, or
   c. If the individual lives together with his or her parent(s) and the individual is under 21 or has blindness or a disability, the individual applying and the parent(s).

2. The family size of an individual for whom the AFDC income and resource methodologies are used (as described in section A), includes the persons who would have been included in the family under the state's July 16, 1996 AFDC state plan, except where the state has elected to use the MAGI-like methodologies (as described in section E).

3. The state defines family size for one or more of the following FPL eligibility groups to include others beyond those identified in D.1 and D.2.
