# **Executive Summary**

Summary Description Including The purpose of this state plan is to eliminate the resource standard for the following Medicare Savings Plan (MSP) Goals and Objectives categories: Qualified Medicare Beneficiaries (QMB), Specified Low-Income Medicare Beneficiaries (SLIMB) and Qualified Individuals (QI1). This change will enable more low-income individuals to access assistance through MSP categories so that Medicare is more affordable. This change also streamlines the administrative burden for MSP applicants and the Income Support Division as there will be no resource standards. The change will allow HSD to simplify renewals of MSP categories through implementation of an automated ex-parte process that allows for seamless transition from Modified Adjusted Gross Income (MAGI) categories to MSP categories.

| Married Couple Disregard  | For a married individual applying for the Qualified Medicare Beneficiaries program who lives in the same household as his/her ineligible spouse, the state will disregard from the applicant's own total gross monthly income an amount up to the difference between the federal income poverty level (FPL) for the size of the family involved (i.e., two) and the FPL for an individual. The resulting figure will then be compared to the FPL for an individual. If that figure is below the FPL for an individual, the state will proceed to determine the ineligible spouse's total gross income (both earned and unearned) and subtract appropriate living allowances for any ineligible minor dependent children of either member of the couple who live in the home. The resulting combined countable income of the applicant and the ineligible spouse, minus appropriate disregards for unearned and earned income, is then compared to the FPL for two persons. If the combined income is less than the FPL for two persons, the applicant is eligible on the factor of income. |  |  |
