

# NEW MEXICO HEALTH & HUMAN SERVICES DATA BOOK

| Volume 3 2022.1

This page intentionally left blank.

On behalf of all colleagues at all Health and Human Services Departments in New Mexico, we humbly acknowledge we are on the unceded ancestral lands of the original peoples of the Apache, Navajo, and Pueblo past and present.

With gratitude we pay our respects to the land, the people and the communities that have contributed to what today is known as the State of New Mexico.

# DATA BOOK INTRODUCTION

## SECTION 1A

The State of New Mexico Health and Human Services Departments are pleased to present the Data Book, a summary of social, economic, and health statistics of our state. The Data Book presents, in one reference document, a diversity of information and is designed to facilitate comparisons of national, state, and county-level data. The Data Book contains various sections, representing the types of information most frequently requested by a broad range of stakeholders. Section 1A includes the Table of Contents, Welcome Letter, Guide to Using this Data Book, and a Map of Tribal Lands in New Mexico.

# Section 1 | **THANK YOU** FOR WORKING WITH US!

Dear Legislator, Customer, Colleague, Key Partner, or Friend.

This Data Book is the third edition published by the New Mexico Human Services Department (HSD), in collaboration with our sister agencies, to form the first **Health and Human Services Data Book**. To align with Governor Michelle Lujan Grisham’s vision of greater interagency collaboration, we have included point-in-time data representing populations served by the Indian Affairs Department (IAD); the Aging and Long-Term Services Department (ALTSD); the Children, Youth, and Family Department (CYFD); the Department of Health (DOH); the Early Childhood Education and Care Department (ECECD); and the Public Education Department (PED).

The Data Book is designed to provide you with national data that compares New Mexico to other states. Further, the Data Book provides county level information that can be used by you to identify our state’s areas of greatest need and to develop policy solutions that address these needs. This 2022 Data Book is intended to help you easily identify the “hot spots” and needs across our state.

The 2022 Data Book is part of the State’s broader strategy for business transformation and for being trusted fiduciaries of taxpayer dollars, striving to leverage federal funding where appropriate to transform the lives of the New Mexicans we serve. We strive to find innovative ways to deliver our benefits and services to our customers and to connect with the communities we serve. Through a variety of programs described herein, we are deeply honored to serve more than half of all New Mexicans.

The U.S. Census Bureau has postponed the release of the 2016-2020 American Community Survey 5-year dataset to 2022, which means that some of the New Mexico data in this Book is not up to date. We will release an amended 2022 Data Book that incorporates these Census Bureau updates as soon as we are able.

On behalf of our colleagues who work tirelessly at the State of New Mexico, we thank you for your confidence in us and hope that you will find the 2022 Data Book contains an abundance of information that can be used to drive evidenced based policy and legislation to positively transform the lives of New Mexicans.

Sincerely,

**David R. Scrase M.D.**

# Guide to Using this | DATA BOOK

## INFORMATION AT YOUR FINGERTIPS

The State of New Mexico Health and Human Services Departments are pleased to present the Health and Human Services Data Book, a summary of social, economic, and health statistics of our state. The Data Book presents, in one reference document, a diversity of information and is designed to facilitate comparisons of national, state, and county-level data.

You will see this image of the COVID-19 virus near the colored rectangle (top/bottom left-hand side) for measures affected by the COVID-19 pandemic.

The Data Book contains various sections, representing the types of information most frequently requested by a broad range of stakeholders:

## AGENCY OVERVIEWS

This section provides overviews of the state agencies involved in creation of this book: Aging and Long-Term Services, Children Youth and Families, Department of Health, Early Childhood Education and Care, Human Services, Indian Affairs, and Public Education. Each two-pager includes a summary of divisions and programs, as well as where to go for more information and to apply.

## U.S. & NEW MEXICO DEMOGRAPHIC DATA

This section provides information and statistics across a range of demographic, health, and socioeconomic indicators. U.S. maps are broken out by state, and New Mexico maps are presented at county-level. A text box on the bottom right of each table provides information important for correct interpretation of the table. In many tables, details will not add exactly to the totals and subtotals shown because of rounding.

## U.S. & NEW MEXICO HEALTH AND WELLNESS DATA

This section provides information and statistics across a range of demographic, health, and socioeconomic indicators. U.S. maps are broken out by state, and New Mexico maps are presented at county-level. A text box on the bottom right of each table provides information important for correct interpretation of the table. In many tables, details will not add exactly to the totals and subtotals shown because of rounding.

## PROGRAMS & SERVICES DATA

Programs and Services data illustrates the number of people served by major health and human services agencies as well total program expenditures by county. Additionally, the State of New Mexico recognizes and affirms its government-to-government relationship with its 23 sovereign Pueblos, Nations and Tribal neighbors; and, therefore, has included a series of program enrollment maps among Native Americans.

## COUNTY FACTSHEETS

This section provides comparable information and statistics across a range of demographic and socioeconomic indicators, as well as information related to community resources.

## REFERENCE

This section includes an index, defines acronyms used in the Data Book, and acknowledges those who contributed to the book's creation.

## DATA NOTE

Spreadsheets used to create heat maps and other data visualizations are linked at the bottom of each page with the data source information (you will see an active link if available). Every effort is made to ensure the accuracy of the data presented in the Data Book. However, the Data Book relies on various sources for national and state reporting, with the most recent reporting year often varying. Nevertheless, we have used data from the most recent year available.
