

MHPAEA COMPLIANCE REPORT - UPDATED NOVEMBER 2018

I. INTRODUCTION

The Centers for Medicare & Medicaid Services (CMS) issued a final rule that applies requirements of the Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA) to Medicaid managed care organization (MCO) members' benefits, Medicaid alternative benefit plans (ABPs), and the Children's Health Insurance Program (CHIP)¹. The State of New Mexico Human Services Department (HSD) and its contracted Medicaid/CHIP MCOs submitted a report as required on January 1, 2018 under an approved extension from CMS. This updated report serves as HSD's parity compliance documentation in accordance with 42 CFR Part 438 to reflect implementation of Centennial Care 2.0, which is scheduled for CY 2019. In particular, this report includes the NQTL analysis for a new MCO that was procured in 2017 for Centennial Care 2.0. (See Sections XIII and IX.)

In the fall of 2016, the HSD established a "parity workgroup" that was tasked with overseeing the HSD/MCO parity analyses. The workgroup included representatives from HSD, the New Mexico Behavioral Health Services Division (BHSD) and the HSD's Medical Assistance Division (MAD). HSD is the umbrella agency that oversees the Medicaid/CHIP program. BHSD serves as the Mental Health and Substance Abuse State Authority and oversees the mental health and substance use disorder (MH/SUD) system for adults. The New Mexico Children, Youth and Families Department (CYFD) collaborates with HSD on MH/SUD and SED issues for youth in New Mexico. MAD administers the Centennial Care program (the State's Medicaid/CHIP managed care program) and collaborates with BHSD on MCO oversight and monitoring. HSD, BHSD, CYFD and MAD all participate in the New Mexico Behavioral Health Collaborative (http://newmexico.networkofcare.org/mh/index.aspx), which establishes policies and implements strategies to manage the State's MH/SUD system.

II. METHODOLOGY

The approach and results of each component of the parity analysis are discussed in greater detail in later sections of this report. In general, HSD's approach to conducting the parity analysis followed CMS guidance as outlined in the CMS parity toolkit, *"Parity Compliance Toolkit Applying Mental Health and Substance Use Disorder Parity Requirements to Medicaid and Children's Health Insurance Programs*"² and included the following steps:

1. Identifying all benefit packages to which parity applies.

¹ New Mexico's CHIP program is a Medicaid expansion, so the requirements of 42 CFR Part 438 (not 42 CFR Part 457) apply.

² Parity Compliance Toolkit Applying Mental Health and Substance Use Disorder Parity Requirements to Medicaid and Children's Health Insurance Programs, <u>https://www.medicaid.gov/medicaid/benefits/downloads/bhs/parity-toolkit.pdf</u>

- 2. Determining whether the State or MCO is responsible for the parity analysis (by benefit package).
- 3. Defining mental health (MH), substance use disorder (SUD), and medical/surgical (M/S) services and determining which covered services are MH, SUD, and/or M/S services.
- 4. Defining the four benefit classifications (inpatient, outpatient, prescription drugs, and emergency care) and mapping MH/SUD and M/S services to these classifications.
- 5. Determining whether any aggregate lifetime or annual dollar limits (AL/ADLs) apply to MH/SUD services.
- Determining whether any financial requirements (FRs) or quantitative treatment limitations (QTLs) apply to MH/SUD services in a benefit package and testing the applicable financial requirement for compliance with parity.
- 7. Identifying and analyzing non-quantitative treatment limitations (NQTLs) that apply to MH/SUD services in a benefit package.

III. MEDICAID/CHIP DELIVERY SYSTEM AND BENEFIT PACKAGES Medicaid/CHIP Delivery System

Over 78% of Medicaid/CHIP beneficiaries in New Mexico are enrolled in MCOs. This includes 90% of beneficiaries in New Mexico's adult expansion category of eligibility in the alternative benefit plan (ABP) and 91% of beneficiaries in New Mexico's CHIP program.³ HSD implemented the State's Medicaid managed care program, known as Centennial Care, in January of 2014 under the authority of a Section 1115 Demonstration Waiver. Centennial Care modernized the Medicaid/CHIP program by improving the efficiency and effectiveness of health care delivery; integrating physical, behavioral and long-term care services and supports (LTSS); advancing person-centered models of care; and slowing the growth of program costs. A key component of Centennial Care was the combination of physical and behavioral health services into a fully-integrated model of care, placing the responsibility of all of a member's needs with a single entity (an MCO). As noted above, HSD is in the process of renewing the 1115 Demonstration Waiver (Centennial Care 2.0), which is scheduled to be implemented on January 1, 2019.

HSD provides Home and Community-Based Services (HCBS) through four waiver programs:

- **1915(c) Developmental Disabilities Waiver (DDW)** serves individuals with ID or persons with specific related conditions and DD that occur before the age of 22, including MCO members.
- 1915(c) Medically Fragile Waiver (MFW) serves individuals who are diagnosed with a medically fragile condition, have a developmental disability, developmental delay, and/or are at risk for developmental delay before reaching 22 years of age, including MCO members.
- **1915(c) Mi Via Waiver (MVW)** serves Medically Fragile (MF) individuals and individuals with Intellectual or Developmental Disabilities (ID/DD), includes MCO members.
- Section 1115 Centennial Care Demonstration Waiver includes MCO members who are eligible for Community Benefits and meet a Nursing Facility level of care criteria (NF LOC) that includes needing assistance with two or more activities of daily living. There are two different Community Benefit service

³ As noted above, New Mexico's CHIP program is a Medicaid expansion

delivery models within Centennial Care: Agency Based Community Benefit (ABCB) and Self-Directed Community Benefit (SDCB).

Benefit Packages

HSD identified 19 benefit packages (listed in Table 1 below) subject to the requirements in the final Medicaid/CHIP parity rule. See Appendix 1 for detailed information on the benefit packages, including a mapping of MH, SUD, and M/S services by classification for each benefit package. In each benefit package, New Mexico covers MH and SUD services in each classification in which there is an M/S service (all four benefit classifications).

TABLE 1 - MCO MEMBER BENEFIT PACKAGES

Benefit Packages

- 1) Medicaid adults (21 and over)
- 2) Medicaid children (under 21)
- 3) Medicaid adults (21 and over) receiving the agency-based community benefit
- 4) Medicaid children (under 21) receiving the agency-based community benefit
- 5) Medicaid adults (21 and over) receiving the self-directed community benefit
- 6) Medicaid children (under 21) receiving the self-directed community benefit
- 7) ABP MCO adults (21 and over)
- 8) ABP MCO children (19-20)
- 9) CHIP children (0-18)⁴
- 10) Working disabled (WDI) adults (21 and over)
- 11) WDI children (18-20)
- 12) Pregnant women adults (21 and over)
- 13) Pregnant women children (under 21)
- 14) DDW adults (21 and over)
- 15) DDW children (under 21)
- 16) MFW adults (21 and over)
- 17) MFW children (under 21)
- 18) MVW adults (21 and over)
- 19) MVW children (under 21)

IV. DEFINITION OF MH/SUD AND M/S SERVICES

For the purposes of the parity analysis, HSD adopted the most recent version of the International Classification of Diseases (ICD), the ICD-10-CM, as its standard for defining MH/SUD and M/S services. ICD-10-CM is the current version of the ICD, which is identified in the final Medicaid/CHIP parity rule as an

⁴ As noted above, New Mexico's CHIP program is a Medicaid expansion.

example of a "generally recognized independent standard of current medical practice" for defining M/S, MH, and SUD conditions.

HSD defined⁵ MH/SUD services as services for the conditions listed in ICD-10-CM, Chapter 5 "Mental, Behavioral, and Neurodevelopmental Disorders" with the exception of:

- The conditions listed in subchapter 1, "Mental disorders due to known physiological conditions" (F01 to F09);
- The conditions listed in subchapter 8, "Intellectual disabilities" (F70 to F79); and
- The conditions listed in subchapter 9, "Pervasive and specific developmental disorders" (F80 to F89).

HSD defined M/S services as services for the conditions listed in ICD-10-CM Chapters 1-4, subchapters 1, 8 and 9 of Chapter 5, and Chapters 6-20. Given these definitions, HSD determined that, because members must meet ID/DD level of care criteria to participate in a 1915(c) waiver program, and a MH/SUD diagnosis is not a qualifying criterion for waiver participation, all 1915(c) waiver services are considered M/S services.

HSD excluded subchapter 1 from the definition of MH/SUD because these mental disorders are due to known physiological conditions (e.g., vascular dementia and delirium due to known physiological condition) and all, except one, require that the physiological condition is coded first, indicating that the physiological (rather than the mental health) condition is the focus of services. HSD based this exclusion on the structure of the ICD-10-CM.

HSD excluded subchapters 8 (intellectual disabilities) and 9 (developmental disorders) from the definition of MH/SUD consistent with the structure and content of the ICD-10-CM. Chapter 5 of the ICD-10-CM is entitled Mental, Behavioral, and Neurodevelopmental Disorders and is divided into three subsets of disorders; only two of which are Mental and Behavioral. In addition, not including these disorders as MH/SUD disorders is consistent with CMS' definition of "mental disease," in the State Medicaid Manual (SMM) Section 4390.D, which provides as follows: "...the term 'mental disease' includes diseases listed as mental disorders in the [ICD-9-CM], with the exception of mental retardation, senility, and organic brain syndrome."⁶ Also, this definition is consistent with the definition of "Persons with related conditions" in 42 CFR 435.1010: "Persons with related conditions: (a) It is attributable to (1) Cerebral palsy or epilepsy; or (2) Any other condition, other than mental illness, found to be closely related to Intellectual Disability because this condition results in impairment of general intellectual functioning or adaptive behavior similar to that of

⁵ Note the definition of MH/SUD was for purposes of the parity analysis and ensuring that MH/SUD services are provided in parity with M/S services. The exclusion of certain conditions from the parity analysis will not impact eligibility or treatment for conditions excluded from the parity definition of MH/SUD.

⁶ State Medicaid Manual – Part 4 Services, <u>https://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/Downloads/R74SMM.pdf</u>

mentally retarded persons, and requires treatment or services similar to those required for these persons..." (Sections (b) through (d) omitted; emphasis supplied).⁷

V. BENEFIT CLASSIFICATIONS

HSD defined each of the four benefit classifications identified in the Medicaid/CHIP parity rule as described below.

Inpatient (IP): All covered accommodations, services and items (including medications) provided to a member when the member is admitted to a facility that provides overnight care that is not a foster home or non-institutional residence.

Outpatient (OP): All covered services or items (including medications) provided to a member that does not otherwise meet the definition of inpatient, emergency care or prescription drugs. This can include services provided in treatment foster care (TFC), offices, group homes, OP hospitals, agencies and at home. Follow-up services from an IP stay (e.g., heart transplant) that are billed separately from an IP claim are also considered OP services for the purpose of the parity analysis.

Emergency Care (EC): All covered emergency services or items (including medications) provided in an emergency department (ED) or emergency room (ER) setting in an OP hospital setting. Services or items such as urgent care or walk-in clinics that are not specifically ED/ER settings are considered OP.

Prescription Drugs (PD): Covered medications and drugs that: 1) have been assigned a National Drug Code Number by the FDA, 2) have an "effective" rating by the FDA, and (3) are dispensed for self-administration by the beneficiary, or for the beneficiary to take to a practitioner for periodic administration. This also includes insulin, biologicals other than vaccines that that are approved by the public health service, and other drugs declared approved by the FDA on an emergency basis.

VI. AGGREGATE LIFETIME AND ANNUAL DOLLAR LIMITS (AL/ADLS) No aggregate lifetime or annual dollar limits in any classification, apply to Medicaid/CHIP MH/SUD services in any benefit package.

VII. FINANCIAL REQUIREMENTS (FRS) AND QUANTITATIVE TREATMENT LIMITATIONS (QTLS)

Financial Requirements

No financial requirements are applied to MH/SUD services in the inpatient, outpatient or emergency care classifications of any benefit package. For the prescription drugs classification, the MCOs apply copayments to CHIP (\$2 / prescription) and WDI (\$5 / prescription) benefit packages. Copayments are applied without regard to whether the drug is generally prescribed for M/S services or for MH/SUD services. Consistent with federal Medicaid requirements, certain drugs (e.g., prenatal and family planning drugs) are exempt from copayment requirements. Aside from these exclusions, pharmacy copayments are

⁷ 42 CFR § 435.1010 - DEFINITIONS RELATING TO INSTITUTIONAL STATUS, <u>https://www.gpo.gov/fdsys/pkg/CFR-2015-title42-vol4/xml/CFR-2015-title42-vol4-sec435-1010.xml</u>

applied to 100% of M/S prescription drugs, and copayment levels are applied consistently within each benefit package. Given the limited number of M/S drugs exempt from copayments, the State determined that no cost-based analysis was necessary, and the prescription drug copayments are compliant with the Medicaid/CHIP parity rule.

The MCOs apply an annual out-of-pocket maximum of 5% of household income for CHIP and WDI members subject to copayments. These out-of-pocket maximums are applied to all copayments and do not accumulate separately for MH/SUD and M/S services in any classification of any benefit package. As such, the State determined that the application of out-of-pocket maximums is compliant with the Medicaid/CHIP parity rule regarding cumulative financial requirements.

Quantitative Treatment Limitations

HSD does not apply any QTLs in any classification to MH/SUD services that cannot be exceeded when medically necessary. Behavioral health respite was subject to a QTL that set a maximum number of service hours per year, but the State decided to allow the limit to be exceeded based on medical necessity. This change aligns the exceptions process for BH respite with the exceptions process for M/S respite services. Given this change, this limitation was analyzed as an NQTL (see Section VIII of this report). See Section IX below for steps taken to add an exceptions process for BH respite.

VIII. NON-QUANTITATIVE TREATMENT LIMITATIONS (NQTLS)

Identifying NQTLs and Information Collection

Based on the illustrative list of NQTLs in the final Medicaid/parity rule, the parity toolkit, written guidance from the Department of Labor regarding the commercial parity rule (including FAQs, MHPAEA enforcement updates, and a document identifying potential "red flag" NQTLs), information from the State's consultant, and discussion during the workgroup meetings, HSD identified a list of NQTLs that could be applied by the MCOs to MH/SUD services. This list included NQTLs related to medical management, benefits coverage, provider network admission, and prescription drugs. HSD issues the same request for information (RFI) for Western Sky (the newly procured MCO) that was provided to each MCO and State agency that administer benefits in the previous evaluation. The RFI included the list of NQTLs identified by HSD as described above and also asked the MCOs and State agencies to identify any additional NQTLs that the MCOs apply to MH/SUD services. The RFI addressed processes, strategies, evidentiary standards, and other factors in writing and operation for each of the NQTLs that applied to MH/SUD and M/S services, broken down by classification and benefit package group. The RFI included prompts to help identify the type of information relevant to the parity analysis. Separate sets of prompts were provided for processes, strategies, and evidentiary standards for each component of the NQTL analysis (comparability and stringency). The information provided was reviewed by the workgroup, which conducted follow-up requests for additional detail or clarification as needed.

To streamline the NQTL analysis, HSD rolled up the benefit packages into two main groups (see Table 2 below): (1) MCO members receiving all of their services through the MCO, and (2) MCO members receiving services through the MCO and also enrolled in a 1915(c) waiver program managed by HSD on a fee-for-service (FFS) basis.

TABLE 2 – NQTL MCO MEMBER BENEFIT PACKAGE GROUPS											
Benefit Package Group	Benefit Packages										
Group 1: MCO members receiving covered services through the MCO	Benefit packages 1-13 as noted in Table 1 above.										
Group 2: MCO members receiving covered services through the MCO and enrolled in a 1915(c) waiver program managed by HSD as fee- for-service (FFS)	Benefit packages 14-19 as noted in Table 1 above.										

While there is some variation in covered services in Group 1 (i.e., ABP services vs. 1115 services), the MCOs did not indicate any differences in the way the NQTLs were applied in responses to the RFI. Similarly, the FFS 1915(c) services for Group 2 vary by benefit package and each of the MCOs stated that NQTLs were applied to MCO covered services in the same way regardless of the benefit package. In addition, the State applies NQTLs to FFS 1915(c) services in the same way regardless of the benefit package. Based on HSD's definition of MH/SUD and M/S (see Section IV), HSD determined that all of the 1915(c) services are medical/surgical (M/S) services. As a result of these consistencies across benefit packages and NQTLS, the analysis was simplified to reflect that:

- NQTLs that apply to MH/SUD services also apply to 1915(c) waiver services and the processes, strategies and evidentiary standards for the NQTL as it applies to 1915(c) M/S waiver services were included in the NQTL analyses in addition to the processes, strategies and evidentiary standards used in applying the NQTL to M/S non-waiver services.
- Because the strategy for applying the NQTL to outpatient waiver services was different from the strategy for applying the NQTL to MH/SUD outpatient services, the NQTL analysis was conducted relative to the application of the NQTL to non-waiver M/S services using the same strategy.

Conducting the NQTL Analysis

HSD conducted a side-by-side analysis of the RFI responses and compared the processes, strategies, evidentiary standards and other factors for each MH/SUD NQTL as it applied to MH/SUD services and M/S services, by classification for each benefit package. These factors were reviewed for comparability and stringency in writing and in operation.

The NQTL analysis consisted of the following steps:

• Consolidation of the NQTL information collected from the State agencies and the MCOs into a side-byside structure by benefit package group and classification. The information included the MH/SUD and M/S services to which the NQTL applied and a summary of the NQTL's processes, strategies, and evidentiary standards.

- Analysis of the side-by-side information to develop a preliminary determination for each MH/SUD NQTL, by benefit package group and classification.
- Review and revision of the side-by-side summary information and preliminary determinations.
- MCO review of the side-by-side summary information and preliminary determinations.
- Workgroup review of the side-by-side summary information and preliminary determinations and final determination of compliance.

List of MH/SUD NQTLs

Table 3 lists the NQTLs that apply to MH/SUD services, by delivery system, all of which HSD has determined comply with parity. The table also identifies the applicable benefit package groups and classification. In the tables below, a " \checkmark " indicates the NQTL applies to a certain benefit package(s) group and classification(s). Grayed out sections in the tables below indicate the NQTL does not apply to a certain benefit package or classification.

IX. COMPLIANCE PLAN

To ensure ongoing compliance with the final Medicaid/CHIP parity rule, HSD has taken the following steps identified in Table 4.

TABLE 4 - MEDICAID/CHIP PARITY RULE COMPLIANCE PLAN

Task	Implementation Date
HSD issued a MHPAEA Letter of Direction (LOD) to all participating MCOs for	Completed in January
calendar year 2018 that:	2018
- Prohibits copayments for MH/SUD services in the inpatient, outpatient	
and emergency care classifications.	
 Requires MCOs to adhere to State policy for prescription drug 	
copayments for CHIP (\$2/prescription) and WDI (\$5/prescription)	
members with exceptions consistent with federal Medicaid	
requirements (e.g., prenatal and family planning drugs).	
 Prohibits MCOs from applying the out-of-pocket maximum to any 	
MH/SUD services separately from M/S services, in any classification	
of any benefit package.	
- Requires MCOs to establish an exceptions process for BH Respite to	
allow the limit to be exceeded based on medical necessity.	
HSD amended all appropriate authorities to remove copayment requirements	Completed in First Quarter
for all MH/SUD services (other than for prescription drugs).	of 2018
HSD updated the sample contract for Centennial Care 2.0 (CY19), including	Completed in
provisions from the LOD issued in January 2018 and copayment changes to	February/March 2018
MH/SUD services.	

X. CONCLUSION

Following the comprehensive review of the State's Medicaid/CHIP delivery system, HSD has determined (including the steps noted in Section IX) to be in compliance with the parity requirements in 42 CFR Part 438 for planned delivery system (CY 2019). HSD will continue to monitor compliance with the final Medicaid/CHIP parity rule on an ongoing basis.
